

Macro-economic comparison report
Generated 2026-09-23 11:30

	Description	City	Steps	Shock week	Replicates	Seeds
Arad shock baseline	No subsidy, no shelter-capacity override (temp_dev_capacity_frac=0.5 default), shock_step=40, steps=150 - 5 seed replicates	Arad	150	week 40	5	60302, 60303, 74110, 82937, 60301

Shelter & reconstruction outcomes
(mean across replicates; range shown in parentheses when replicates differ)

	Arad shock baseline
Buildings destroyed (at shock)	1,306
Buildings reconstructed (by end of sim)	701 (686-709)
In-city shelter - peak households	908 (892-921)
In-city shelter - households at end	0
Sheltered outside city - peak households	1,772 (1,642-1,890)
Sheltered outside city - households at end	0
Temp-dev sites - peak households	1,312 (1,270-1,374)
Temp-dev sites - households at end	0
Permanently displaced (by end of sim)	9,368 (8,837-9,880)

Subsidy policy outcomes
(mean across replicates; range shown in parentheses when replicates differ)

	Arad shock baseline
Residents subsidy mode	0
Businesses subsidy mode	0
Households subsidized (cumulative)	0
Total aid distributed (\$, by end of sim)	0
Businesses subsidized (cumulative)	0
Jobs subsidized (current jobs @ ever-subsidized bldgs)	0
Final total jobs, city-wide (SA_WP)	17,264 (17,031-17,740)
Final average wage (working residents)	10,899 (10,724-11,198)
Final # working residents	9,844 (9,318-10,473)

Total households currently sheltered, any location
mean $\pm$ 1 std across replicates (shock through settling)

Cumulative permanent displacement
mean $\pm$ 1 std across replicates (shock through settling)

Population (occupied assets) (SA_POP, sum across SAs)

Average individual wage (SA_WAGE, mean across SAs)

Job occupancy rate (SA_JOBS, mean across SAs)

Average asset price (SA_PRICE, mean across SAs)

Commercial building count (SA_SERVICE, sum across SAs)

Residential asset price (SA_HOUSE, mean across SAs)

Commercial asset price (SA_COMERCIAL, mean across SAs)

Residential building count (SA_RESIDENT, sum across SAs)

Workplace count (SA_WP, sum across SAs)

Local-work ratio (SA_LOCAL, mean across SAs)

Working ratio (employed/jobs) (SA_WORKING, mean across SAs)

Idle ratio (unemployed/labor force) (SA_IDLE, mean across SAs)

Total commercial building area (SA_AREA, sum across SAs)

Income decile 1 household count (SA_FIRST, sum across SAs)

Income decile 2 household count (SA_SECOND, sum across SAs)

Income decile 3 household count (SA_THIRD, sum across SAs)

Income decile 4 household count (SA_FOURTH, sum across SAs)

Income decile 5 household count (SA_FIFTH, sum across SAs)

Income decile 6 household count (SA_SIXTH, sum across SAs)

Income decile 7 household count (SA_SEVENTH, sum across SAs)

Income decile 8 household count (SA_EIGHTH, sum across SAs)

Income decile 9 household count (SA_NINTH, sum across SAs)

Income decile 10 household count (SA_TENTH, sum across SAs)

Jobs per m2 (SA_JPM2, SA_WP / SA_AREA, city-total ratio)

Jobs per Occupied Asset (SA_JPP, SA_WP / SA_POP, city-total ratio)

Total Households (SA_TOTAL_HH, sum of the 10 income-decile city totals)

Jobs per Total Households (SA_JPTOTAL, SA_WP / SA_TOTAL_HH, city-total ratio)

1e7 Total Wage Income (SA_WAGE_TOT, SA_WAGE(mean) * SA_TOTAL_HH, city-total product)

Wage-to-House Price Ratio (SA_WAGE_HPRICE, SA_WAGE / SA_HOUSE, city-total ratio)
