

Macro-economic comparison report
Generated 2026-09-23 08:39

	Description	City	Steps	Shock week	Replicates	Seeds
mode 1	No-shock baseline (reference) - no subsidy, no shelter policy, shock never fires	Tiberias	150	no shock	3	74110, 82937, 30581
mode 2	No subsidy, limited shelter capacity (temp_dev_capacity_frac=0.5)	Tiberias	150	week 25	3	74110, 82937, 30581
mode 3	No subsidy, full shelter capacity (temp_dev_capacity_frac=1.0)	Tiberias	150	week 25	3	74110, 82937, 30581

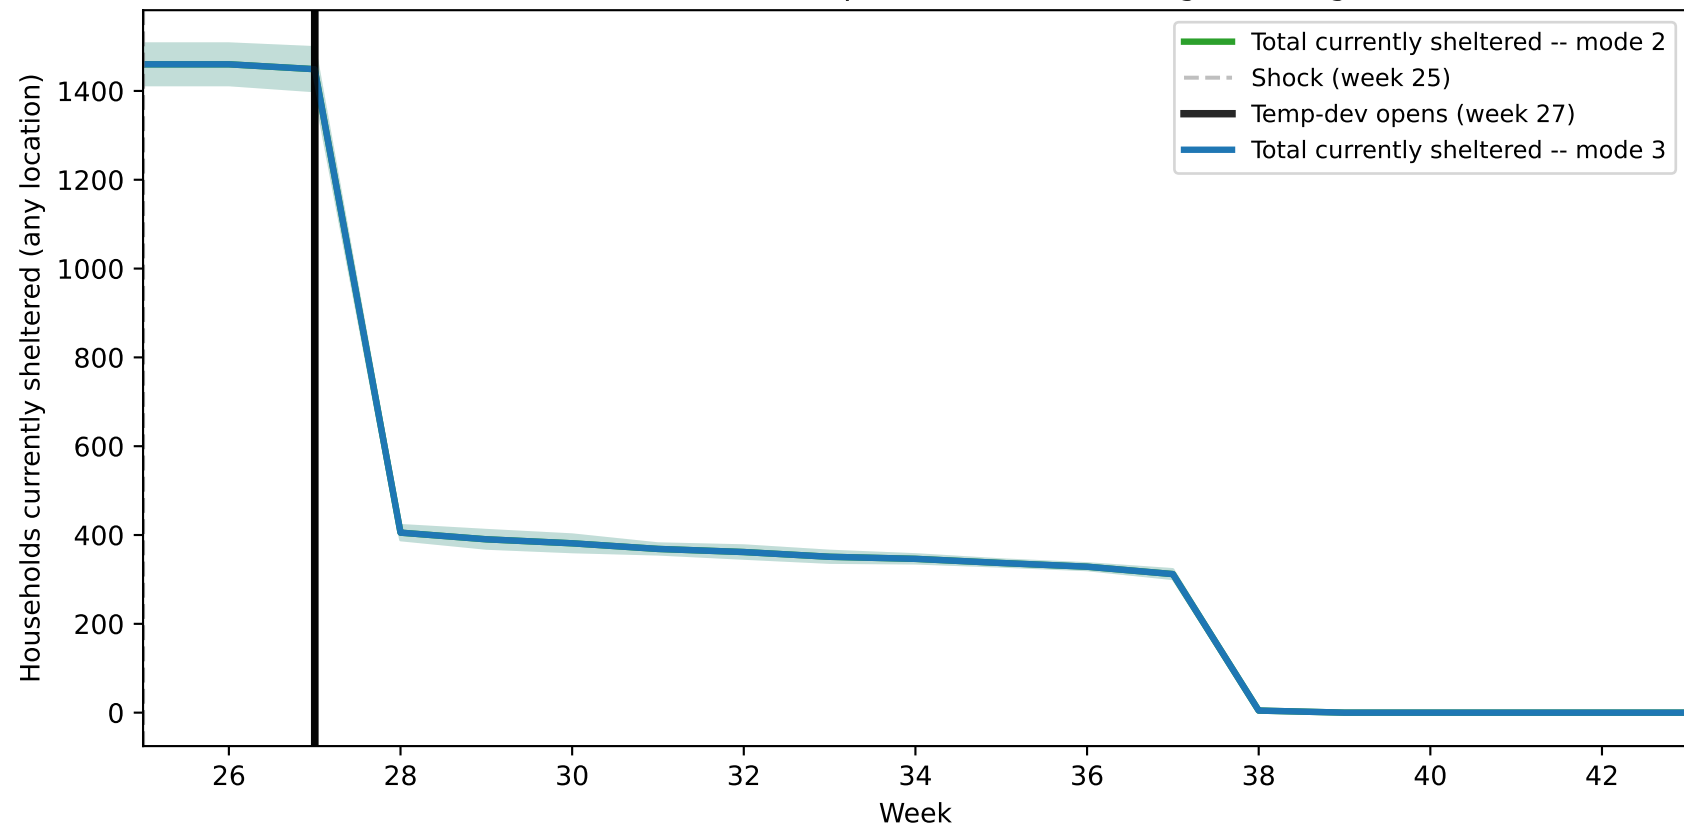

Shelter & reconstruction outcomes
(mean across replicates; range shown in parentheses when replicates differ)

	mode 1	mode 2	mode 3
Buildings destroyed (at shock)	0	356	356
Buildings reconstructed (by end of sim)	0	210 (204-218)	210 (204-218)
In-city shelter - peak households	0	1,460 (1,414-1,507)	1,460 (1,414-1,507)
In-city shelter - households at end	0	0	0
Sheltered outside city - peak households	0	0	0
Sheltered outside city - households at end	0	0	0
Temp-dev sites - peak households	0	716 (695-738)	1,447 (1,399-1,495)
Temp-dev sites - households at end	0	0	0
Permanently displaced (by end of sim)	0	1,269 (1,245-1,306)	1,269 (1,245-1,306)

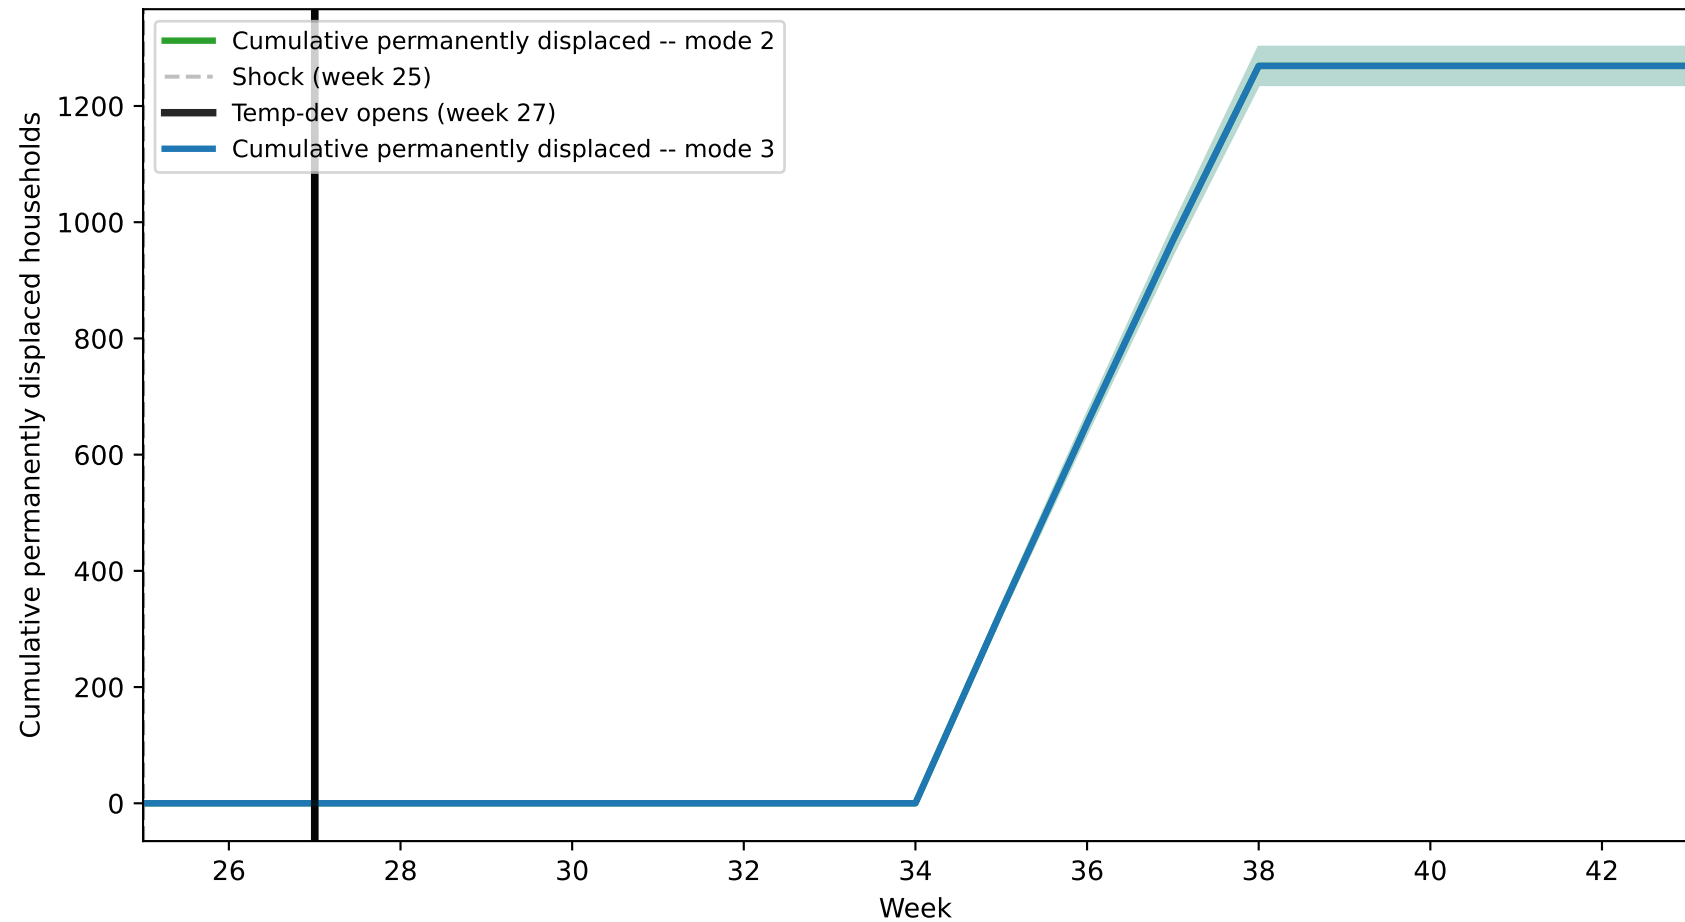

Subsidy policy outcomes
(mean across replicates; range shown in parentheses when replicates differ)

	mode 1	mode 2	mode 3
Residents subsidy mode	0	0	0
Businesses subsidy mode	0	0	0
Households subsidized (cumulative)	0	0	0
Total aid distributed (\$, by end of sim)	0	0	0
Businesses subsidized (cumulative)	0	0	0
Jobs subsidized (current jobs @ ever-subsidized bldgs)	0	0	0
Final total jobs, city-wide (SA_WP)	12,206 (12,174-12,243)	12,337 (12,185-12,445)	12,367 (12,277-12,445)
Final average wage (working residents)	8,387 (8,376-8,395)	8,381 (8,368-8,393)	8,381 (8,368-8,392)
Final # working residents	19,131 (19,121-19,145)	18,808 (18,758-18,868)	18,791 (18,748-18,868)

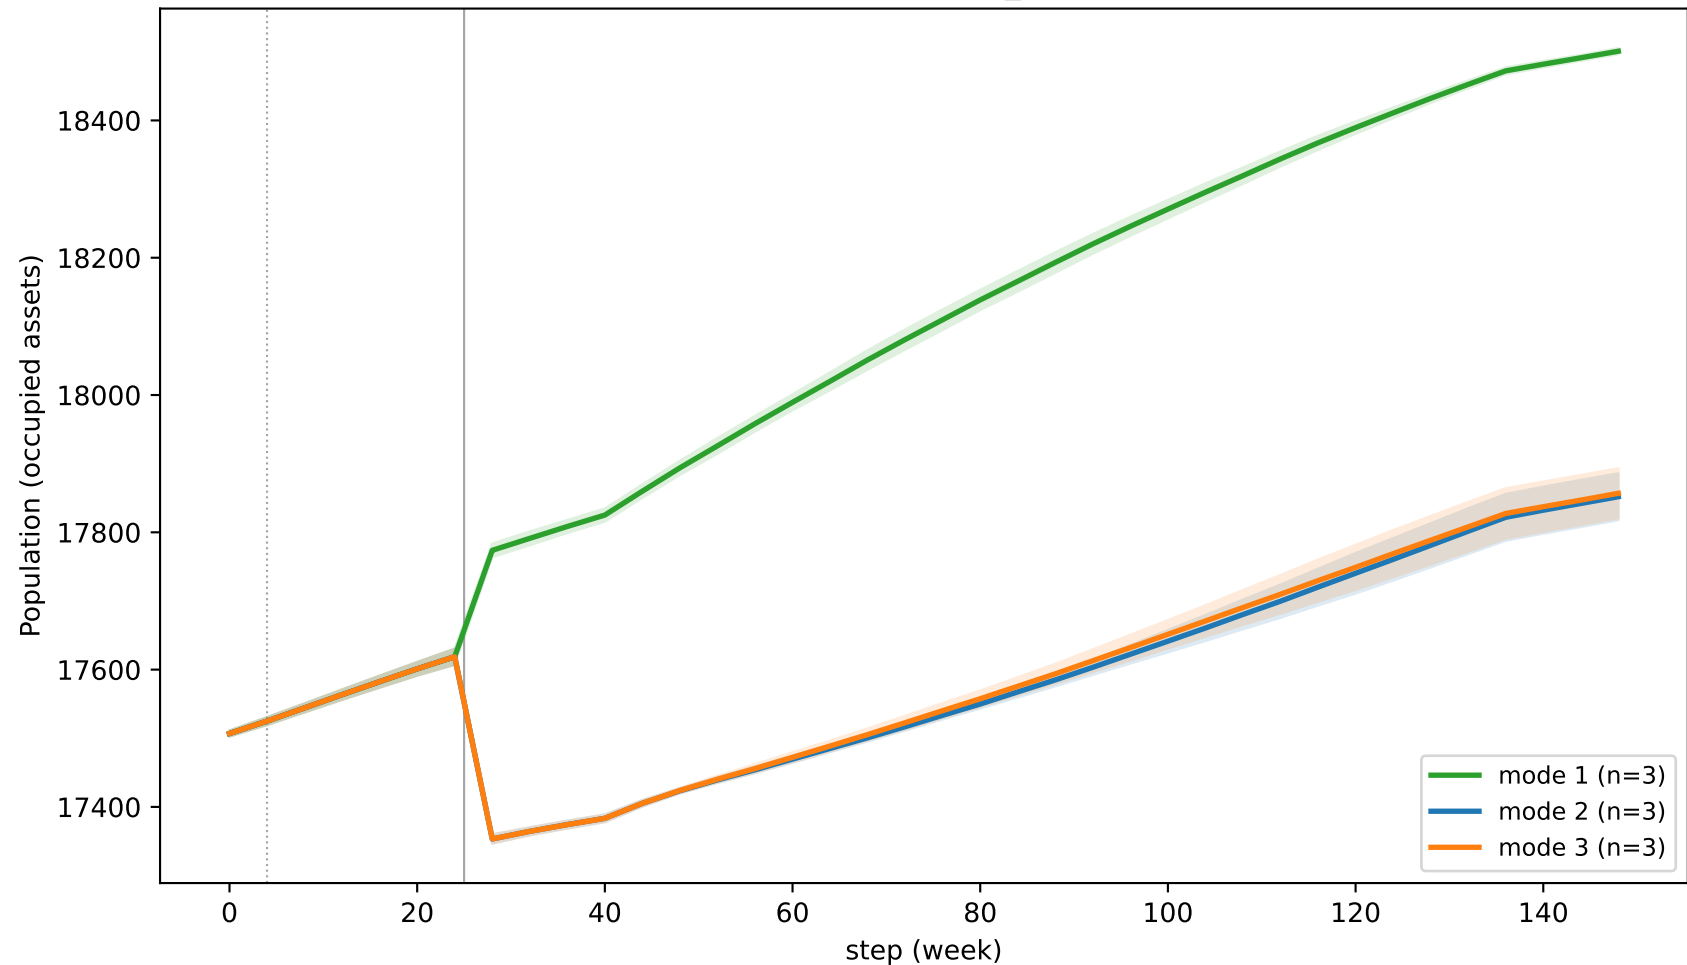

Total households currently sheltered, any location
mean $\pm$ 1 std across replicates (shock through settling)

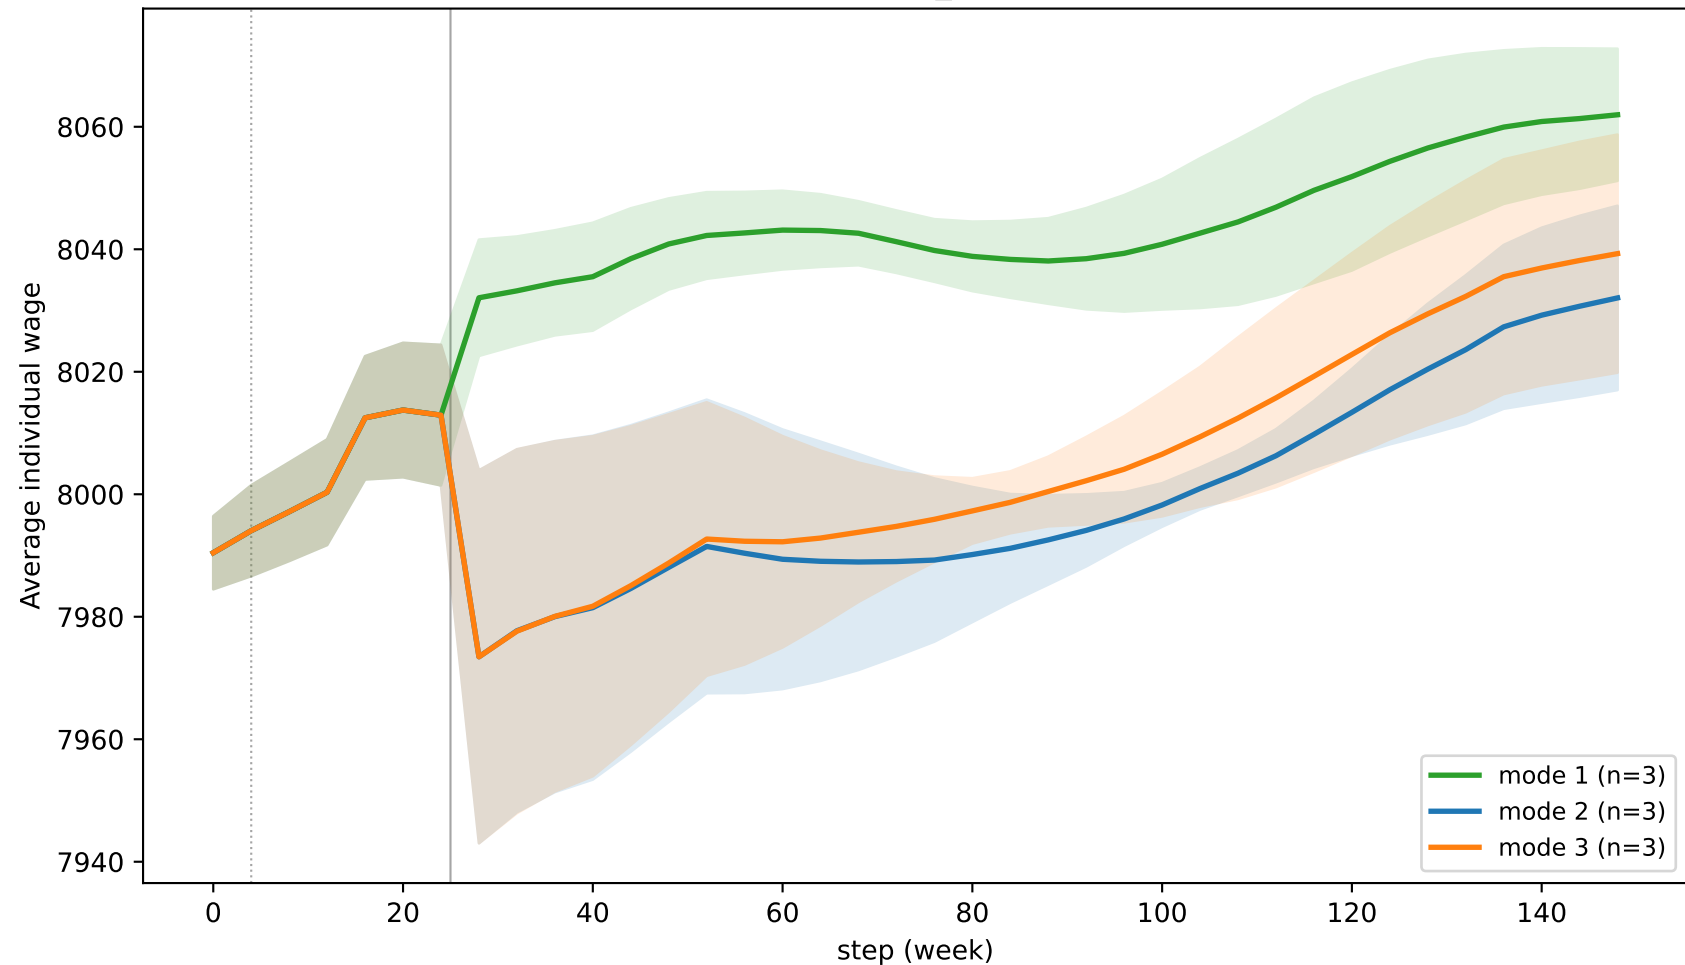

Cumulative permanent displacement
mean $\pm$ 1 std across replicates (shock through settling)

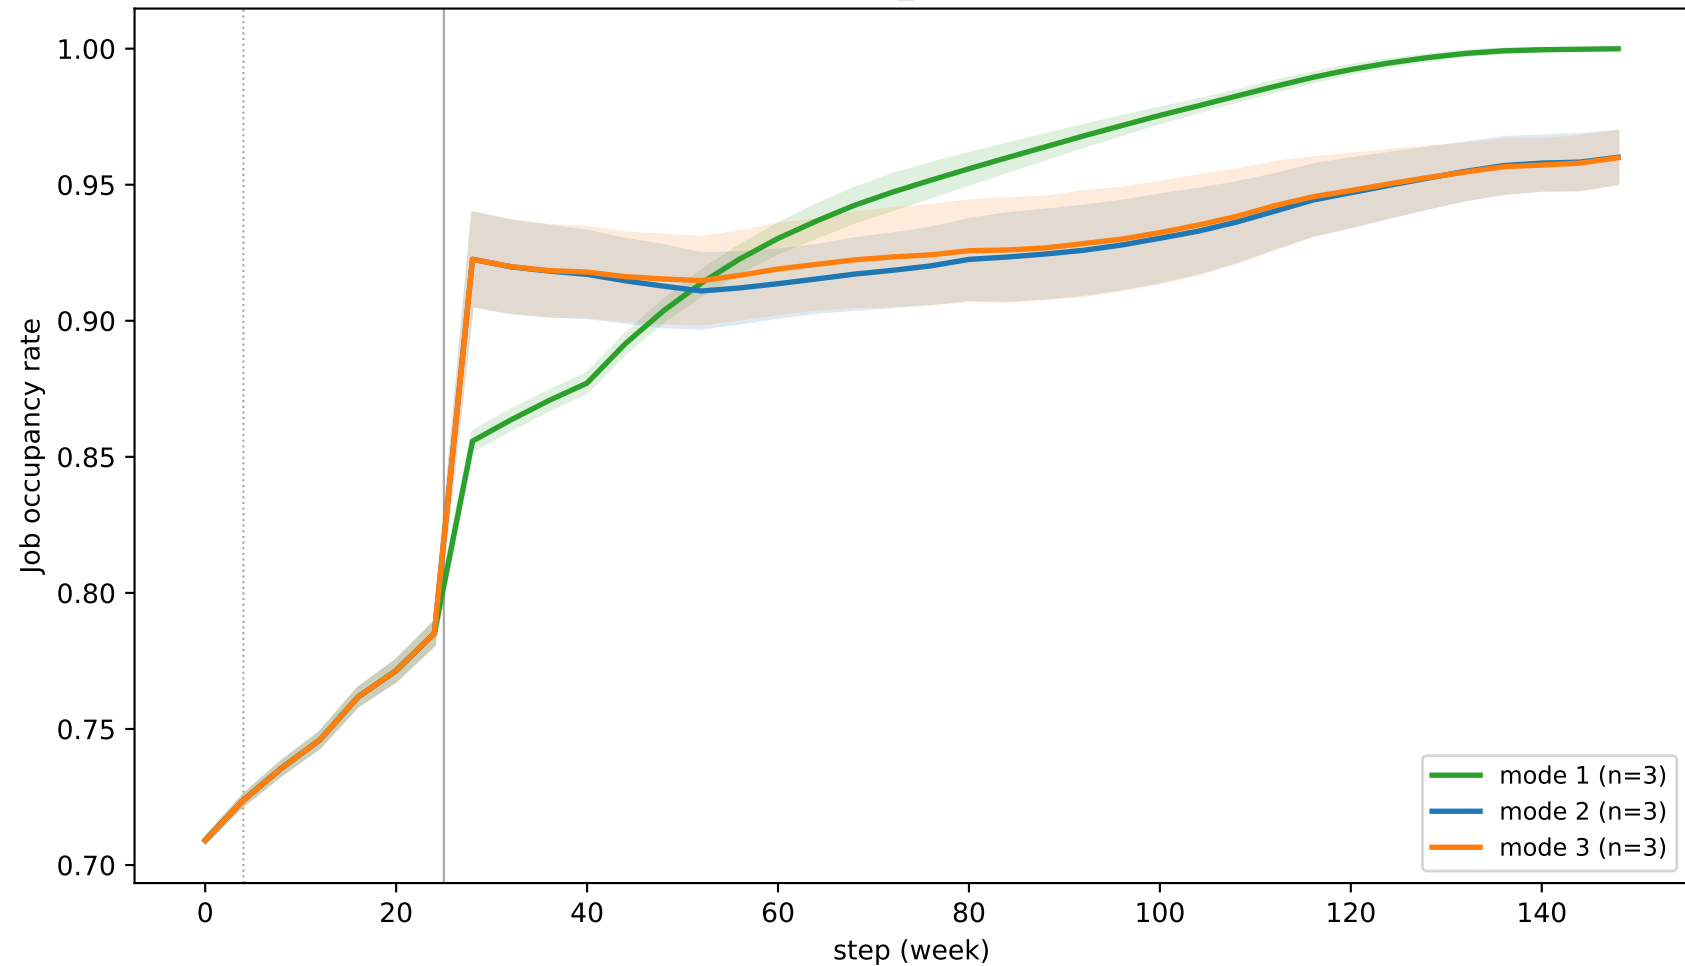

Population (occupied assets) (SA_POP, sum across SAs)

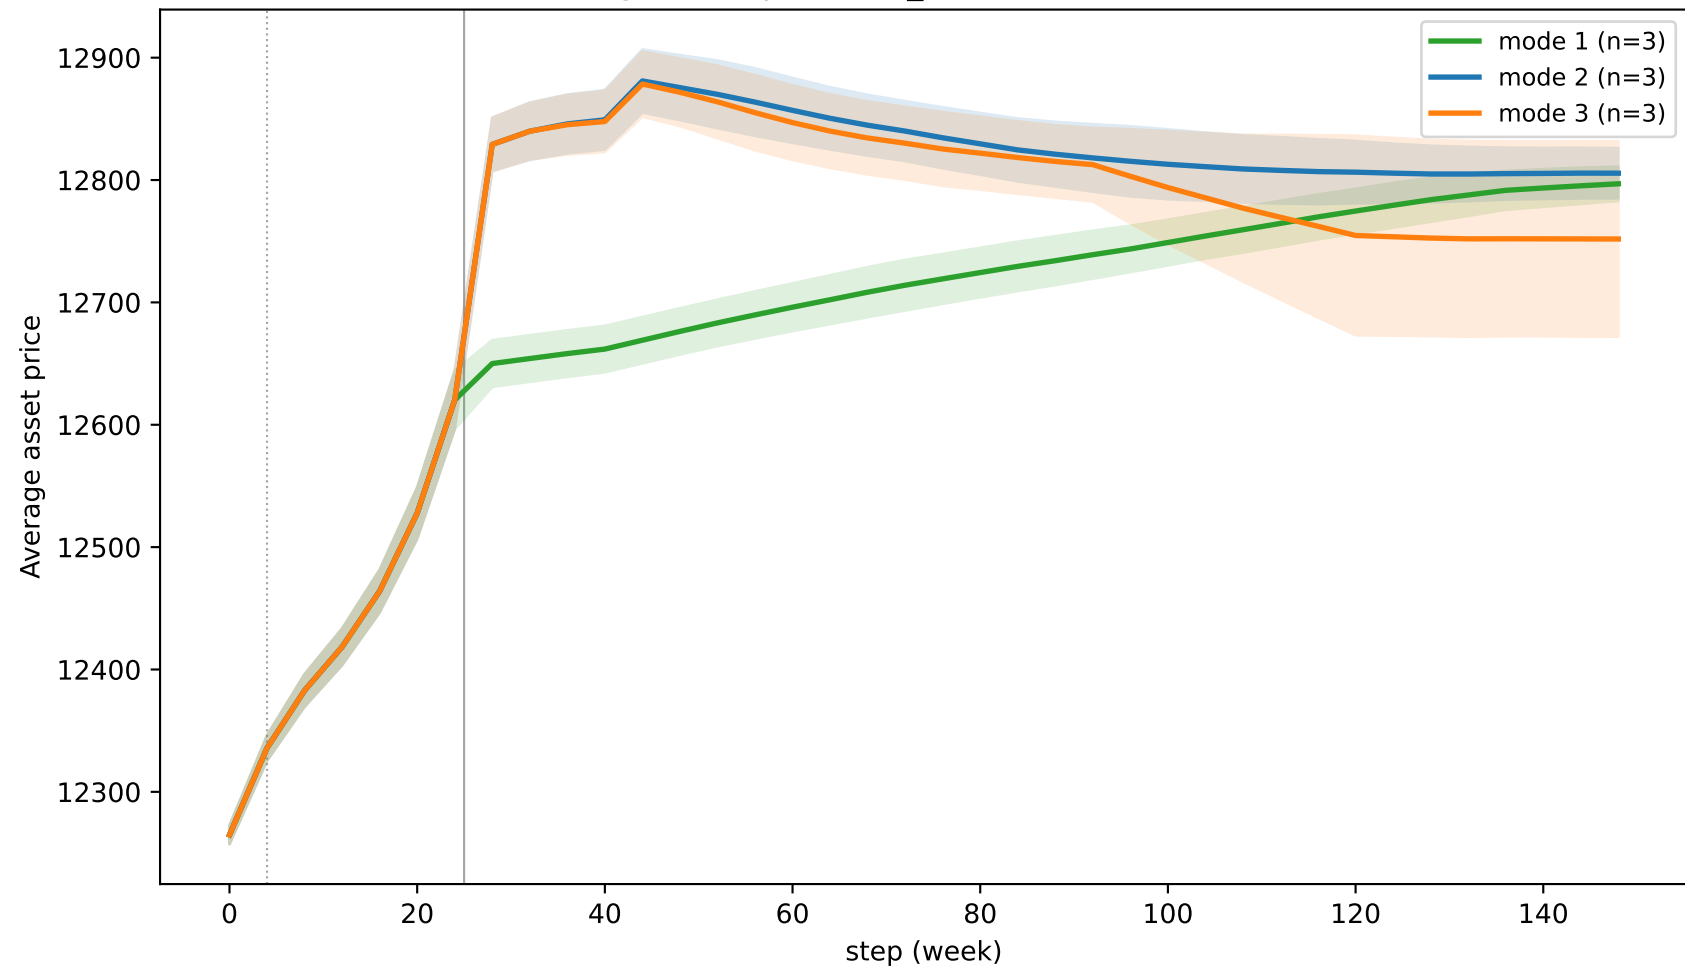

Average individual wage (SA_WAGE, mean across SAs)

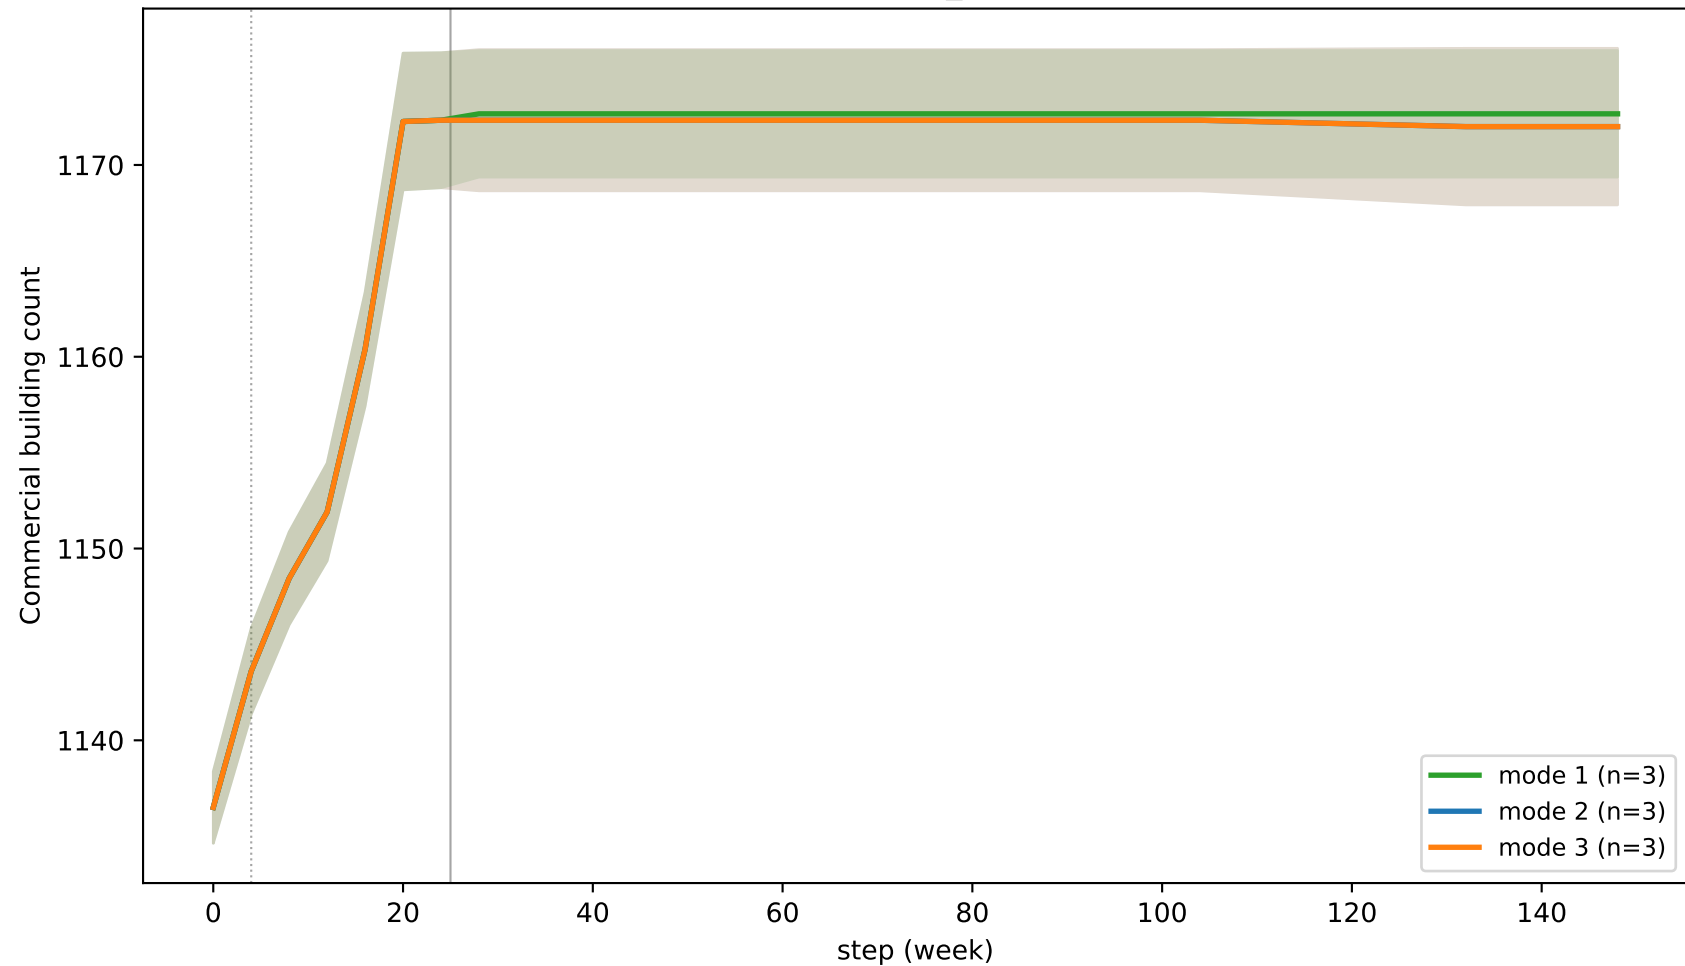

Job occupancy rate (SA_JOBS, mean across SAs)

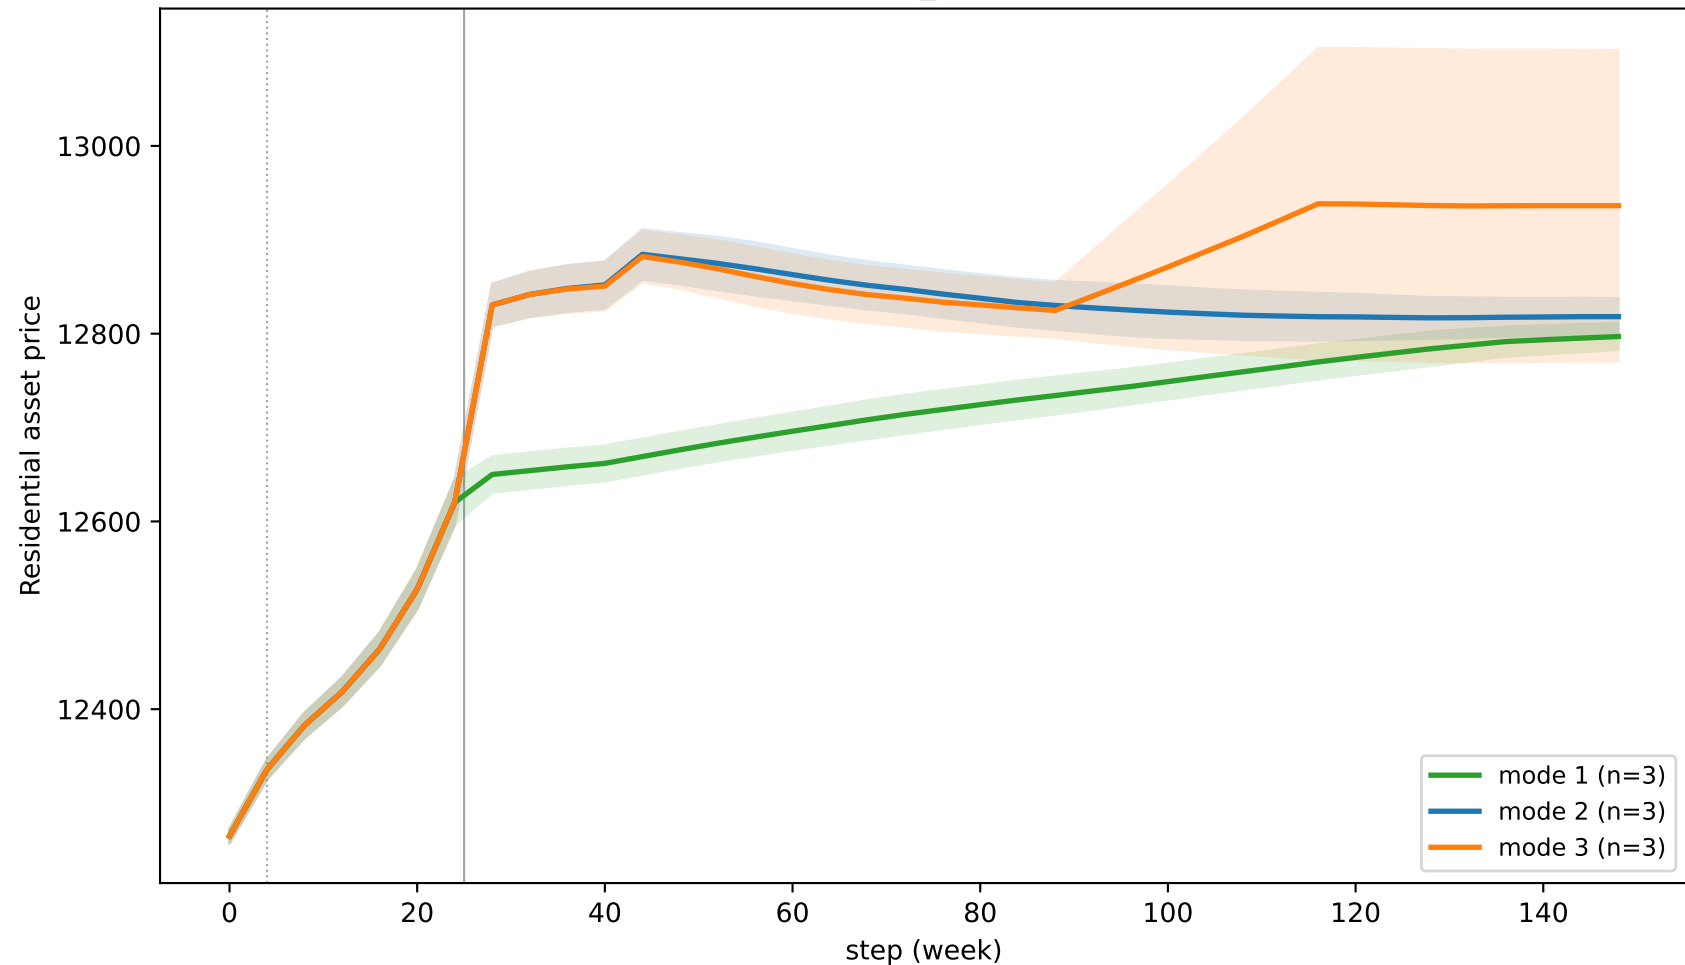

Average asset price (SA_PRICE, mean across SAs)

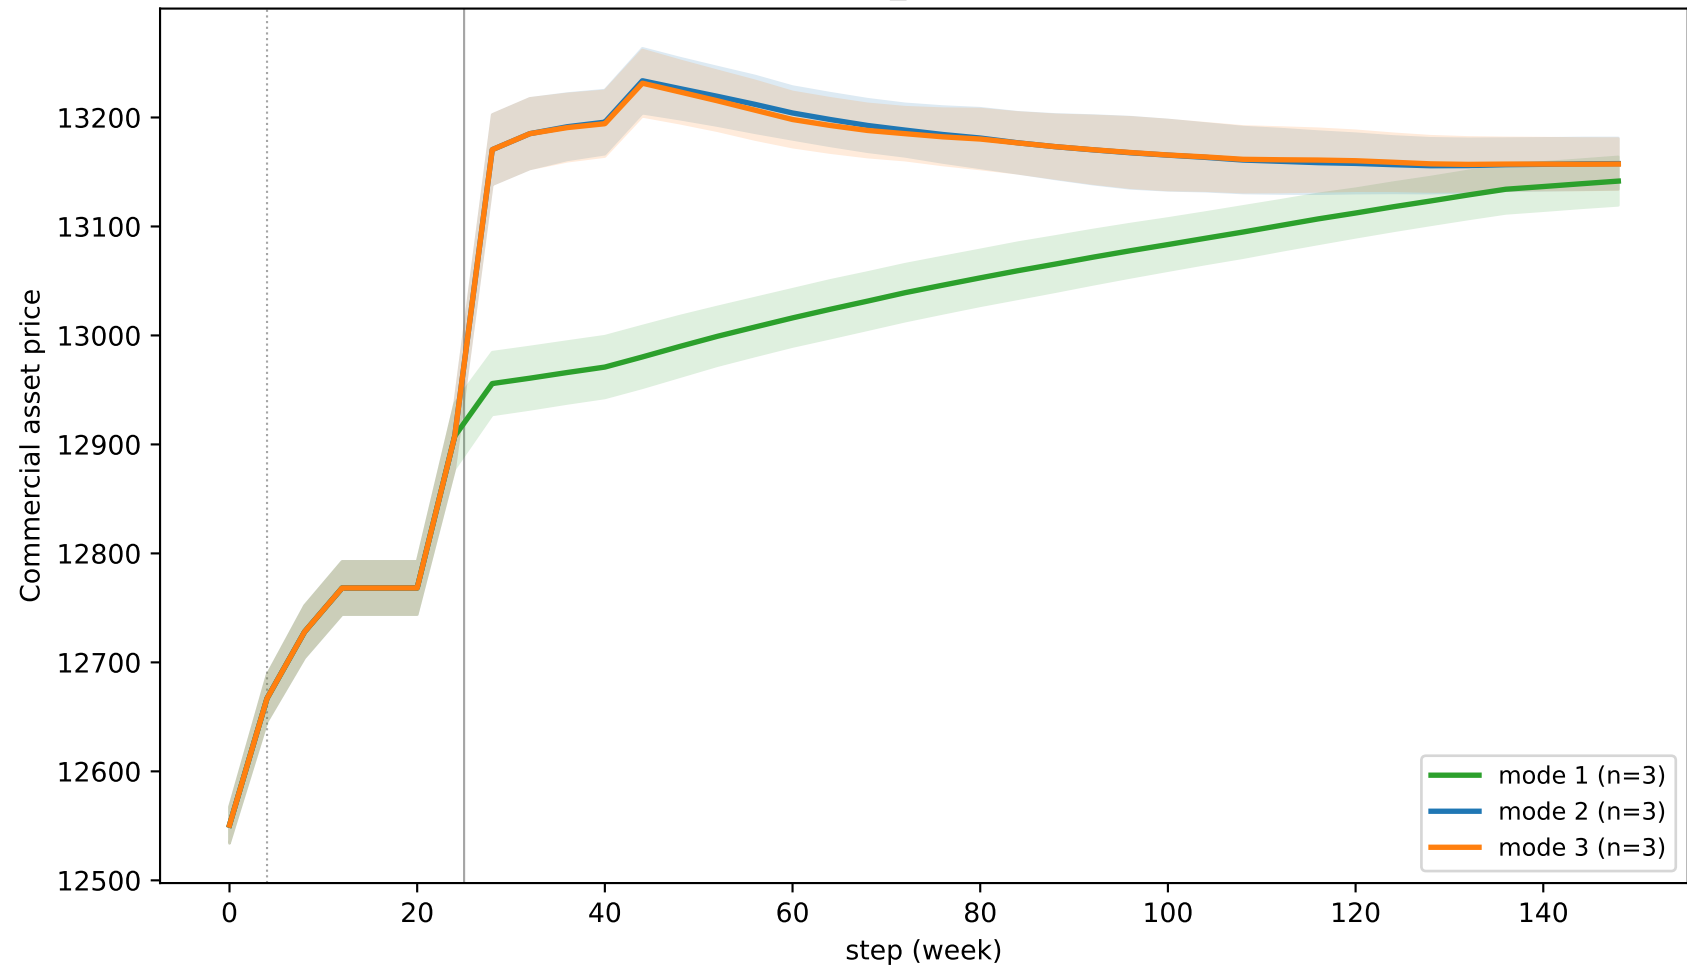

Commercial building count (SA_SERVICE, sum across SAs)

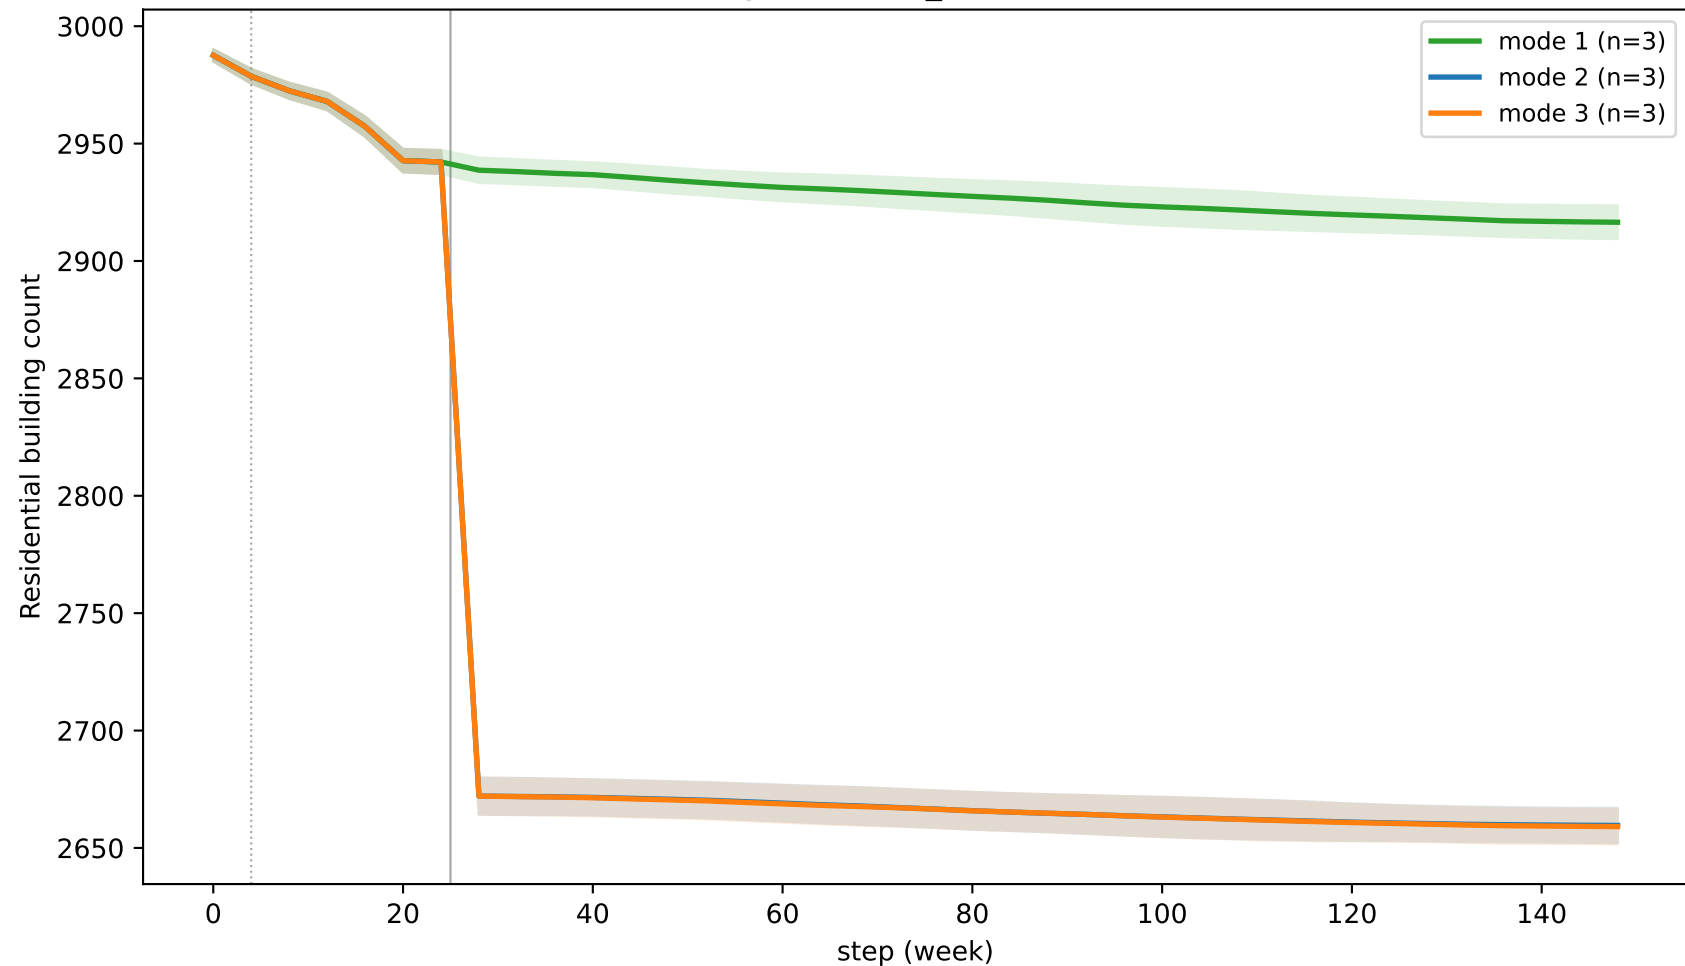

Residential asset price (SA_HOUSE, mean across SAs)

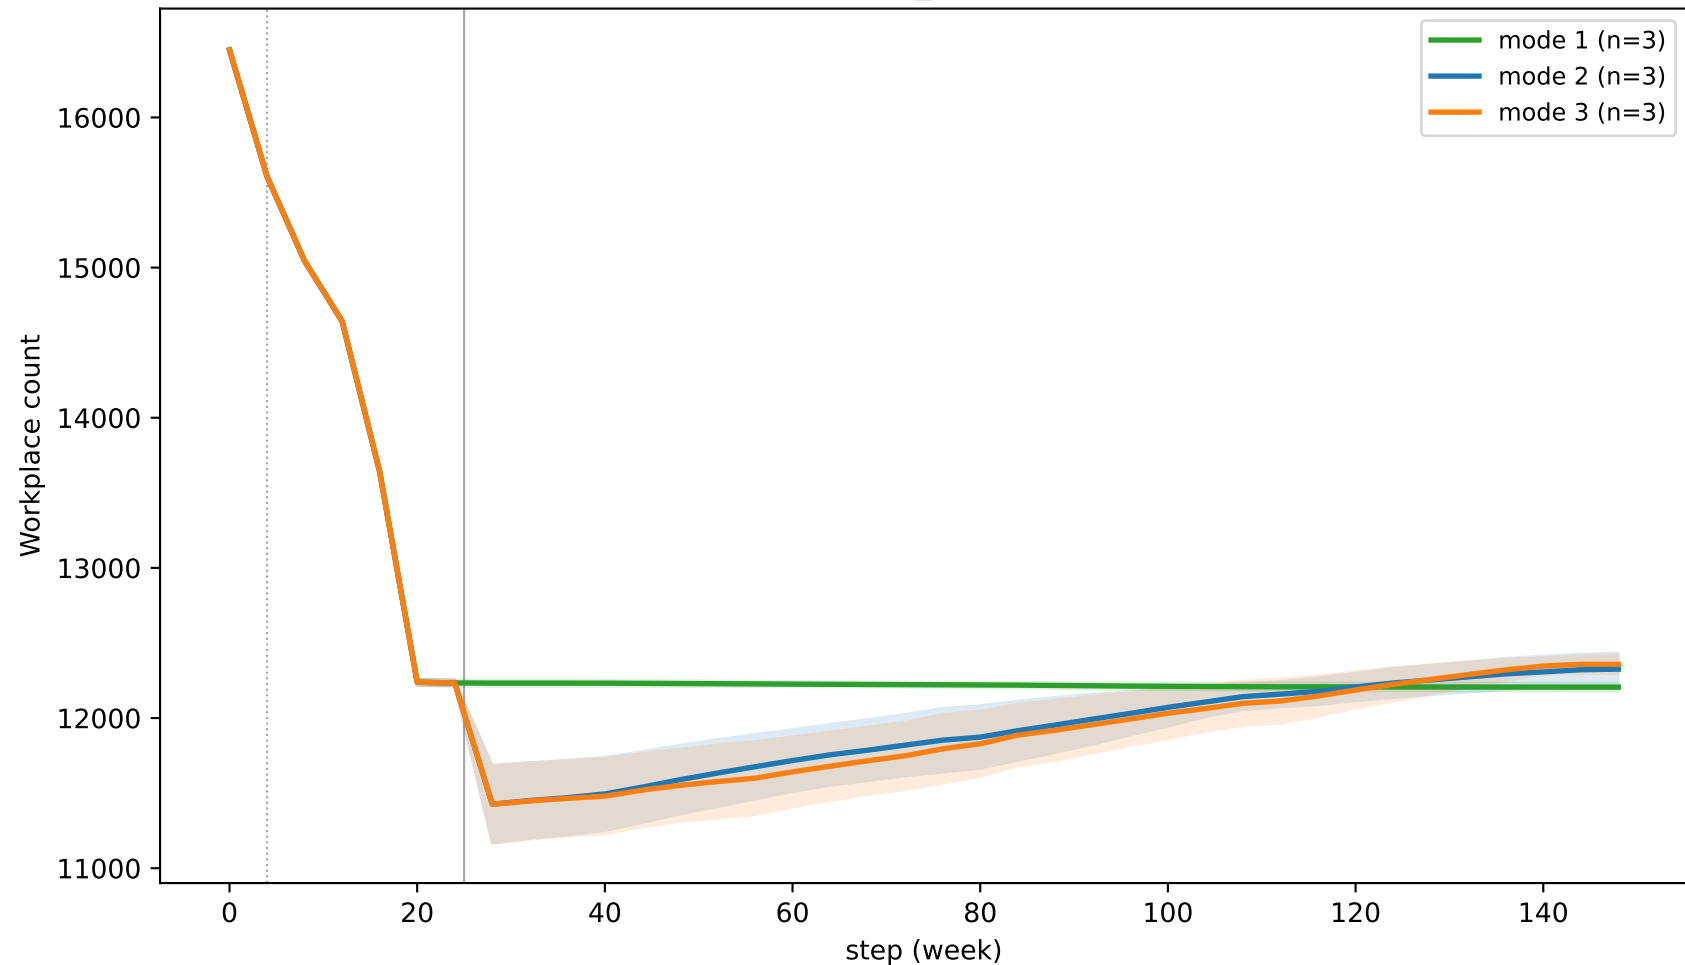

Commercial asset price (SA_COMERCIAL, mean across SAs)

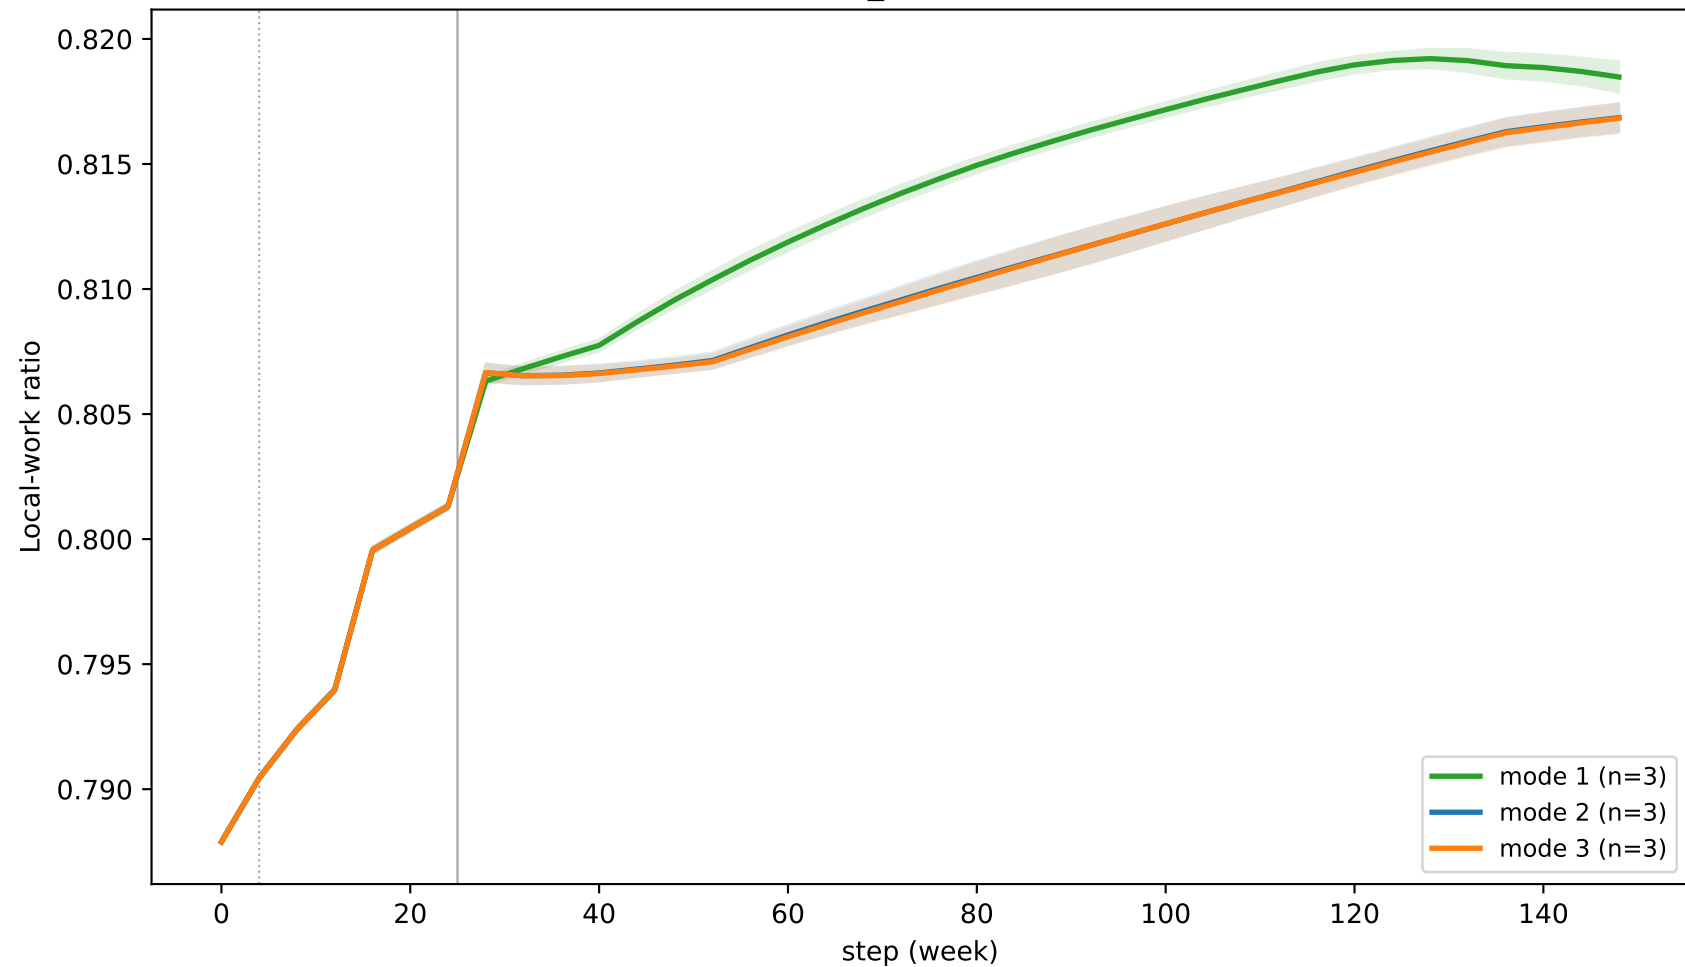

Residential building count (SA_RESIDENT, sum across SAs)

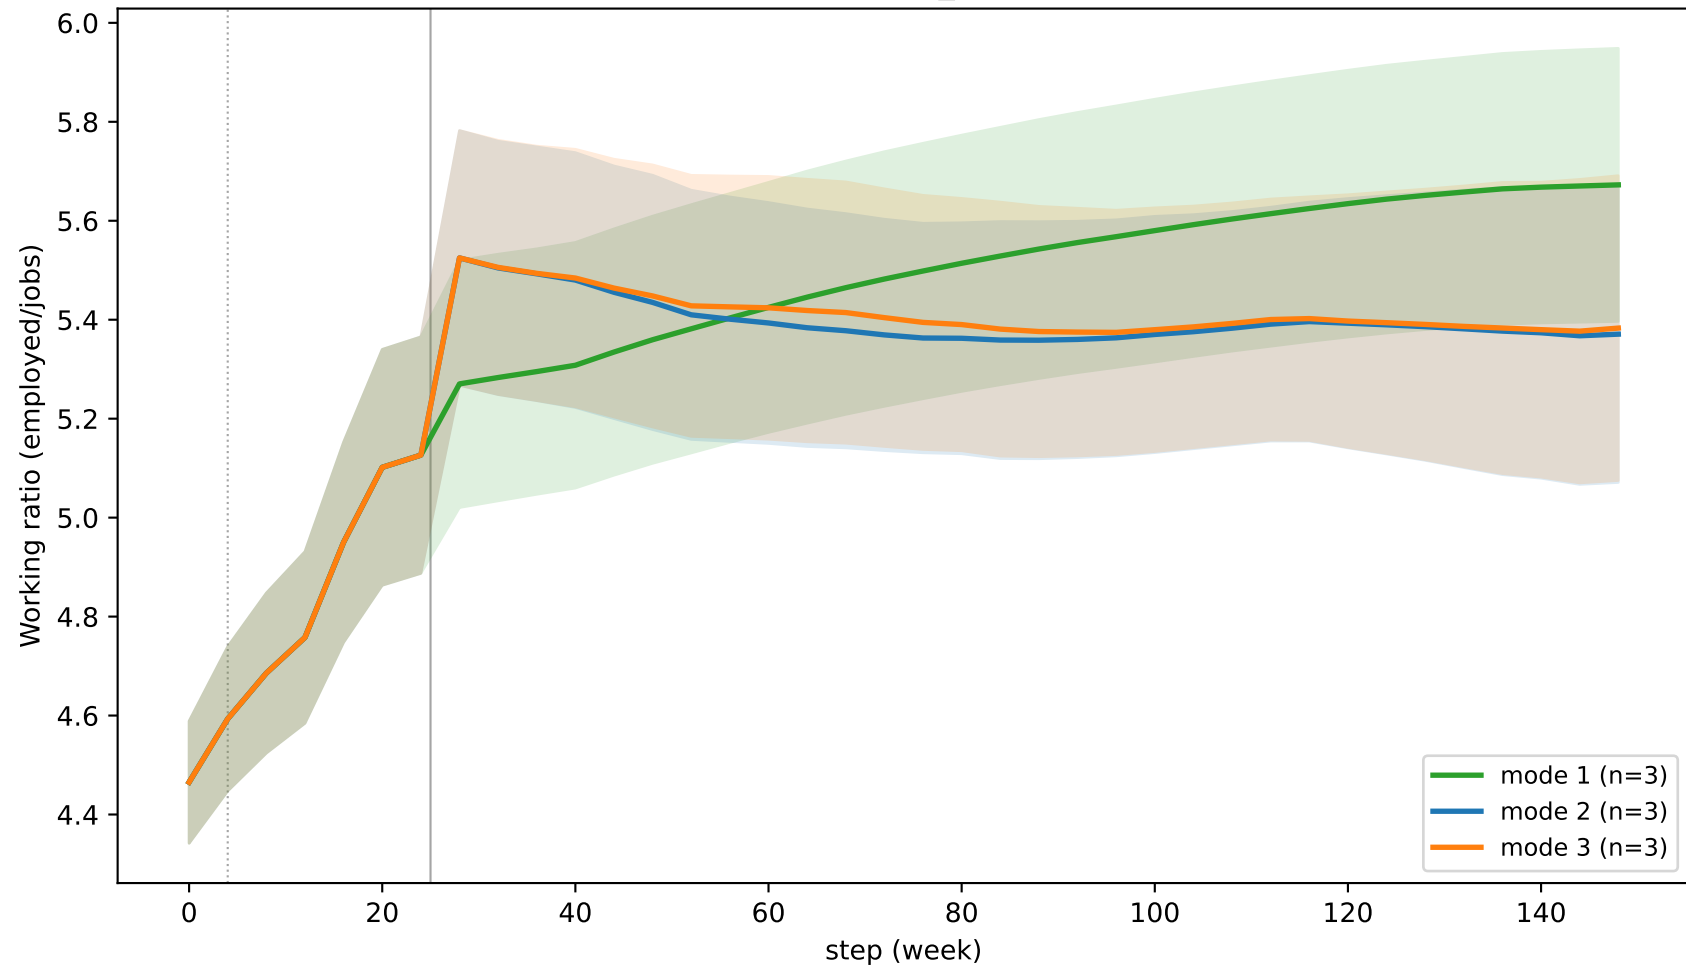

Workplace count (SA_WP, sum across SAs)

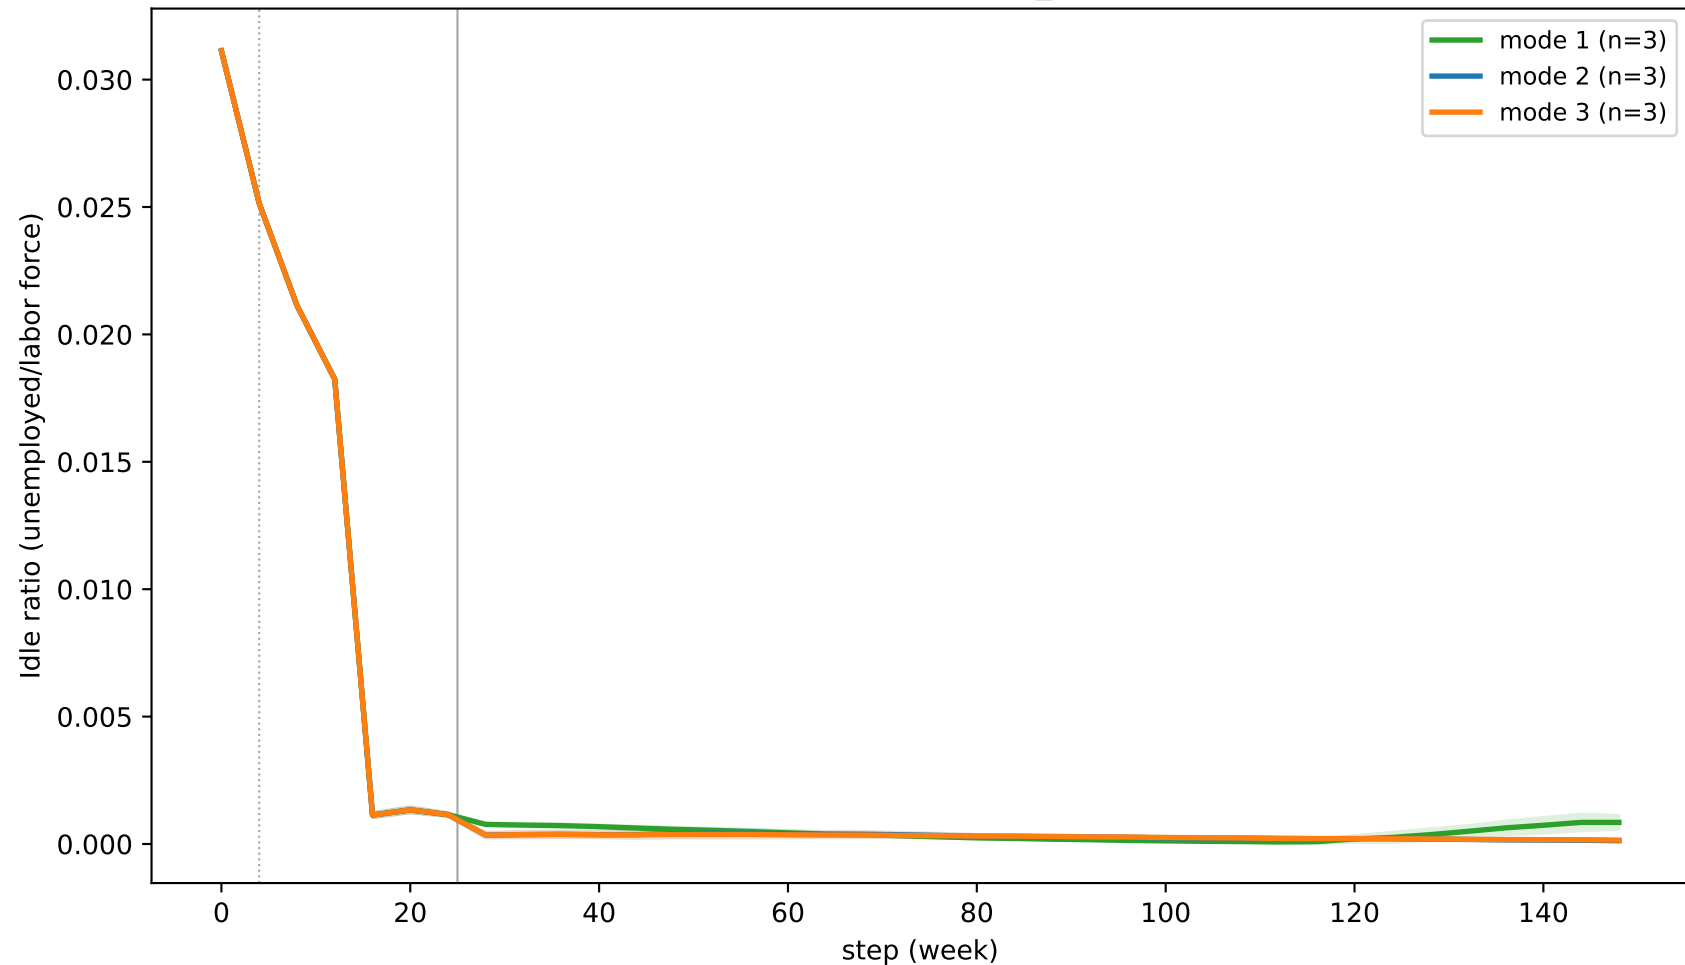

Local-work ratio (SA_LOCAL, mean across SAs)

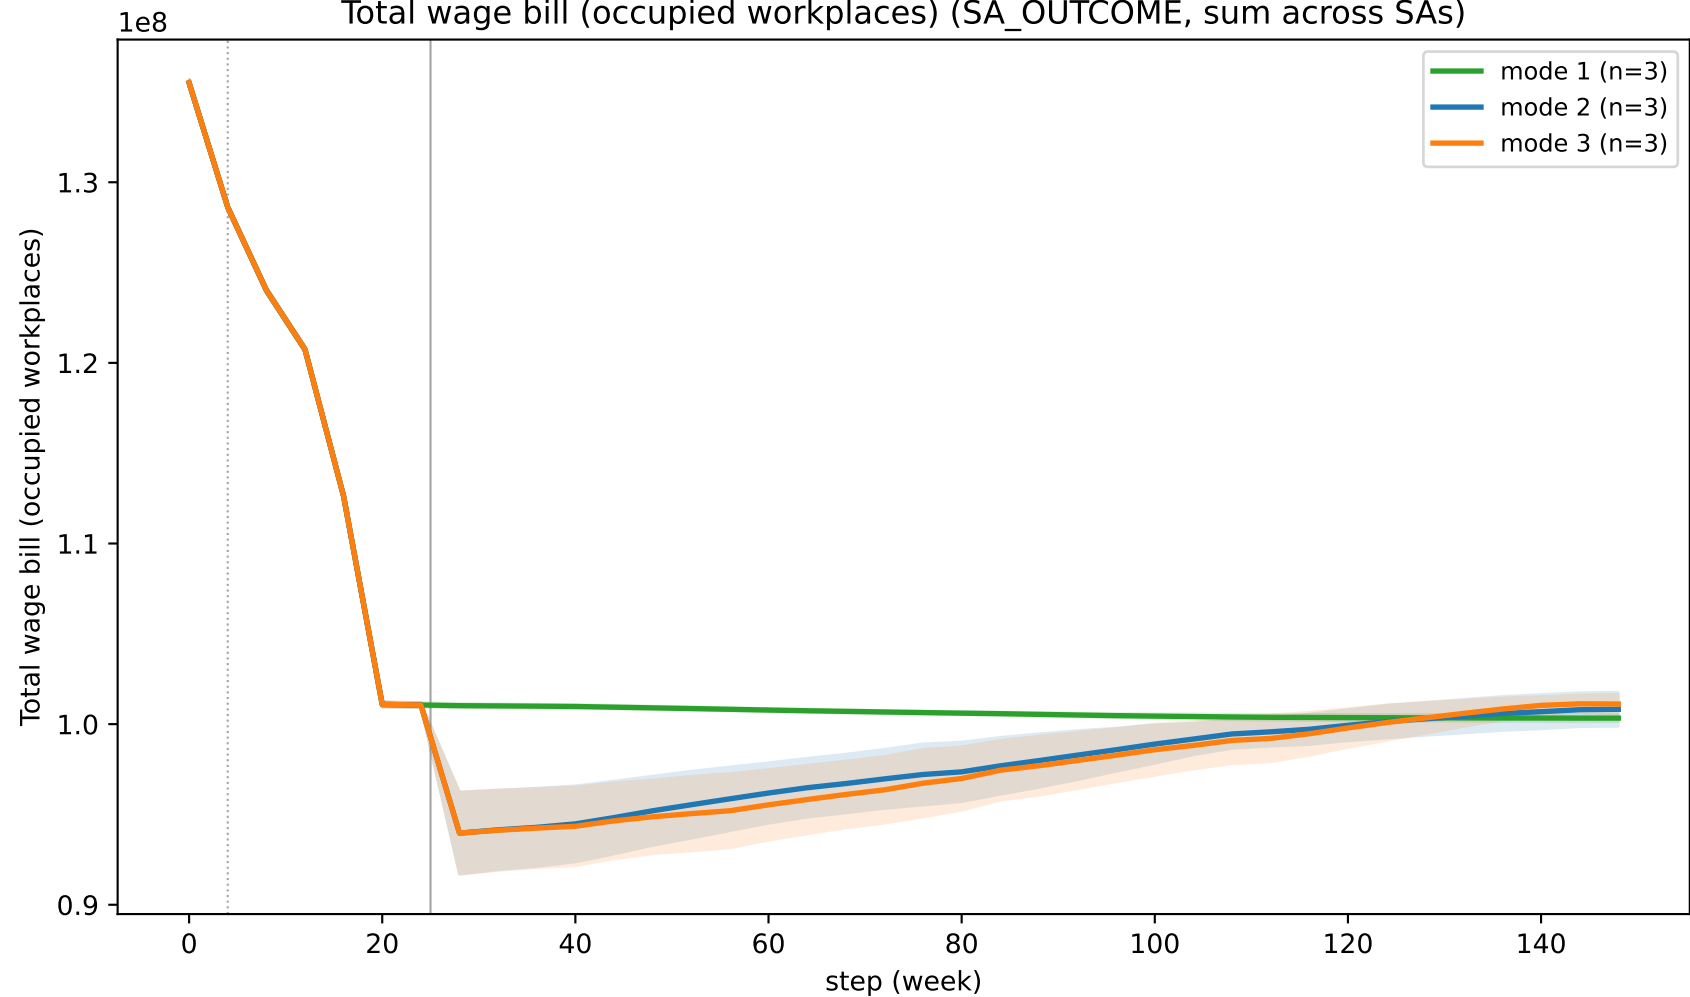

Working ratio (employed/jobs) (SA_WORKING, mean across SAs)

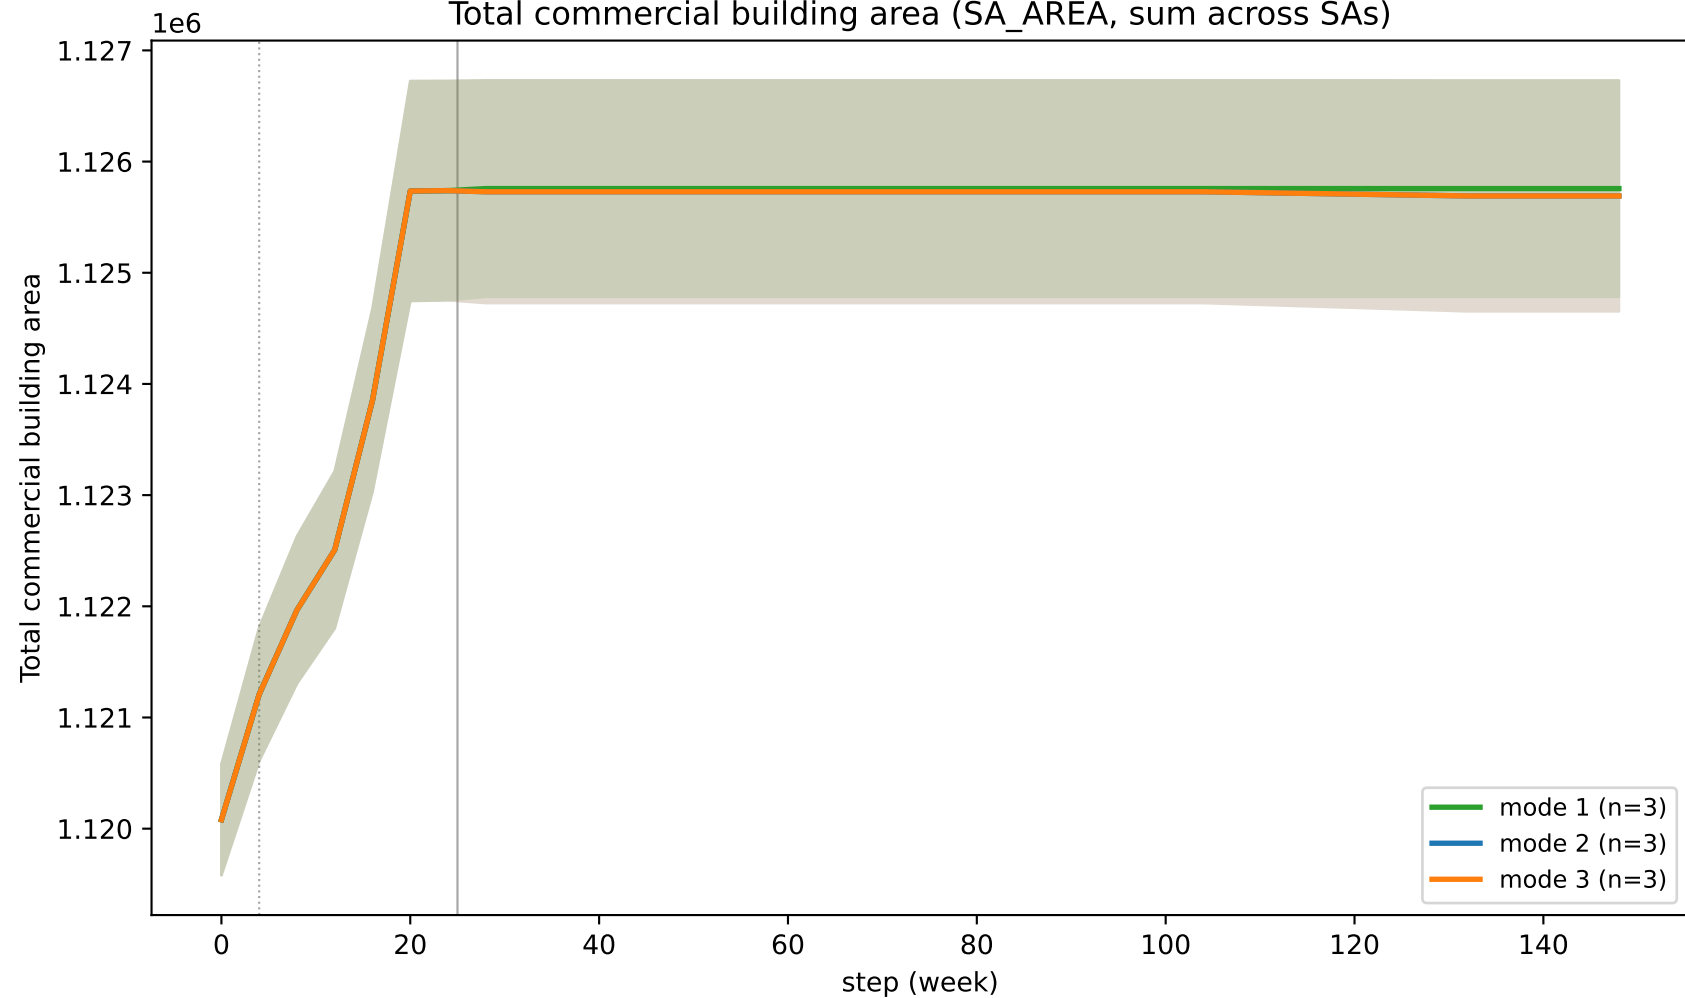

Idle ratio (unemployed/labor force) (SA_IDLE, mean across SAs)

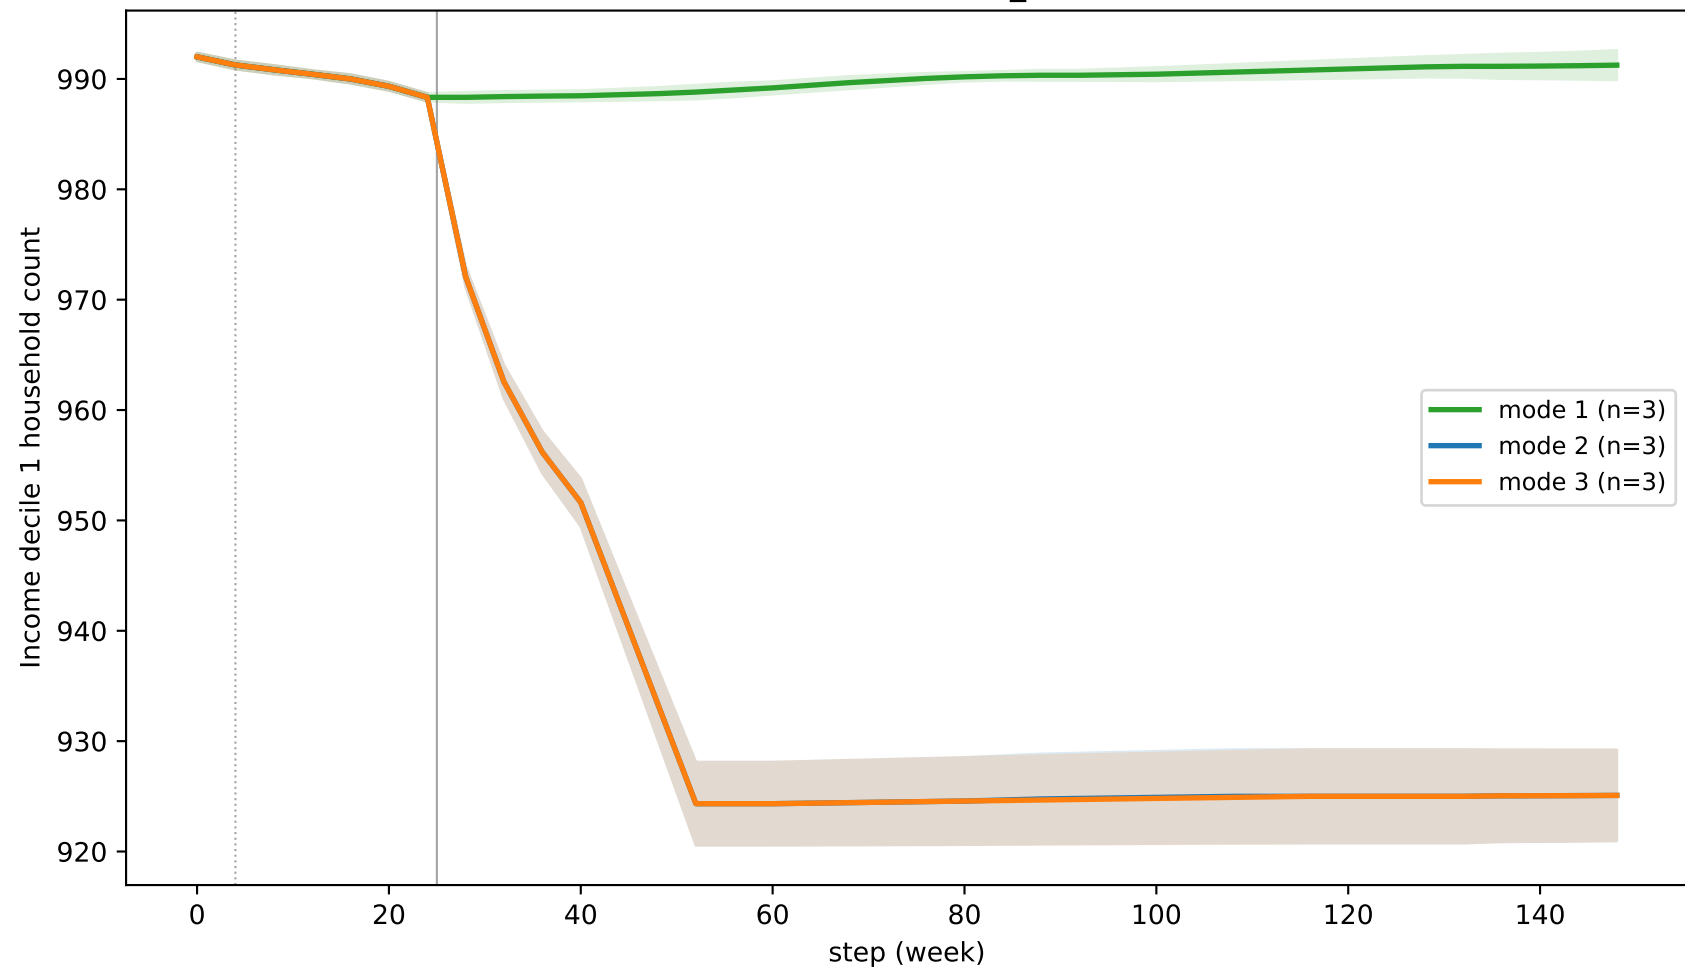

Total wage bill (occupied workplaces) (SA_OUTCOME, sum across SAs)

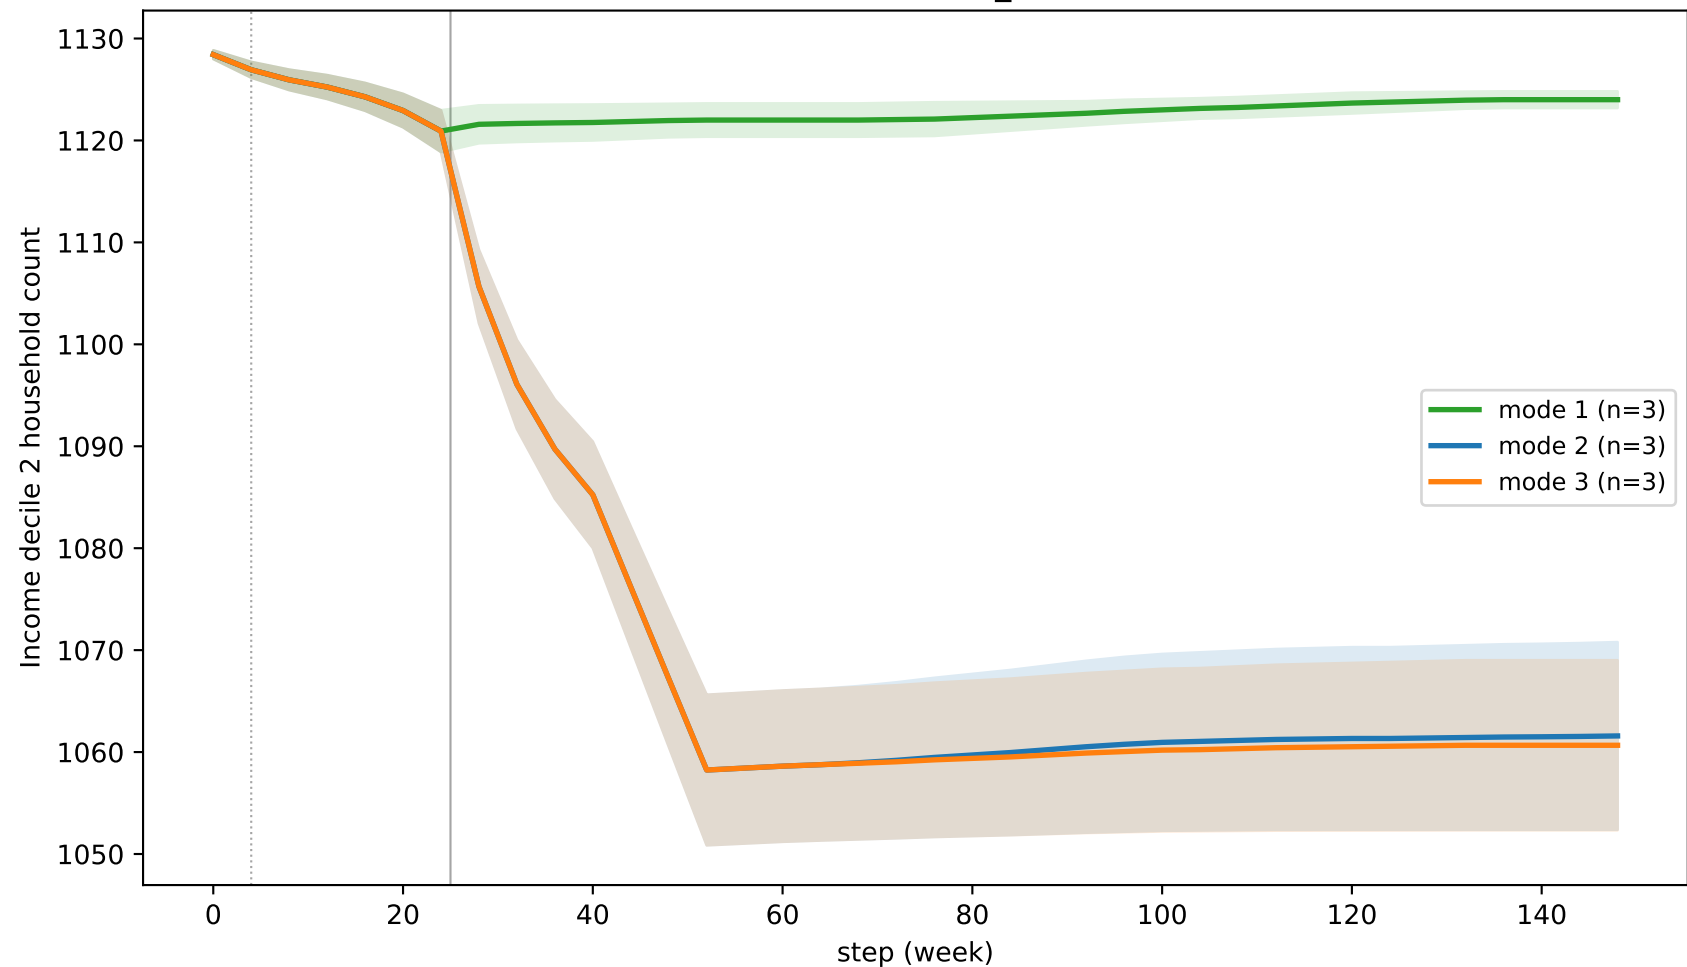

Total commercial building area (SA_AREA, sum across SAs)

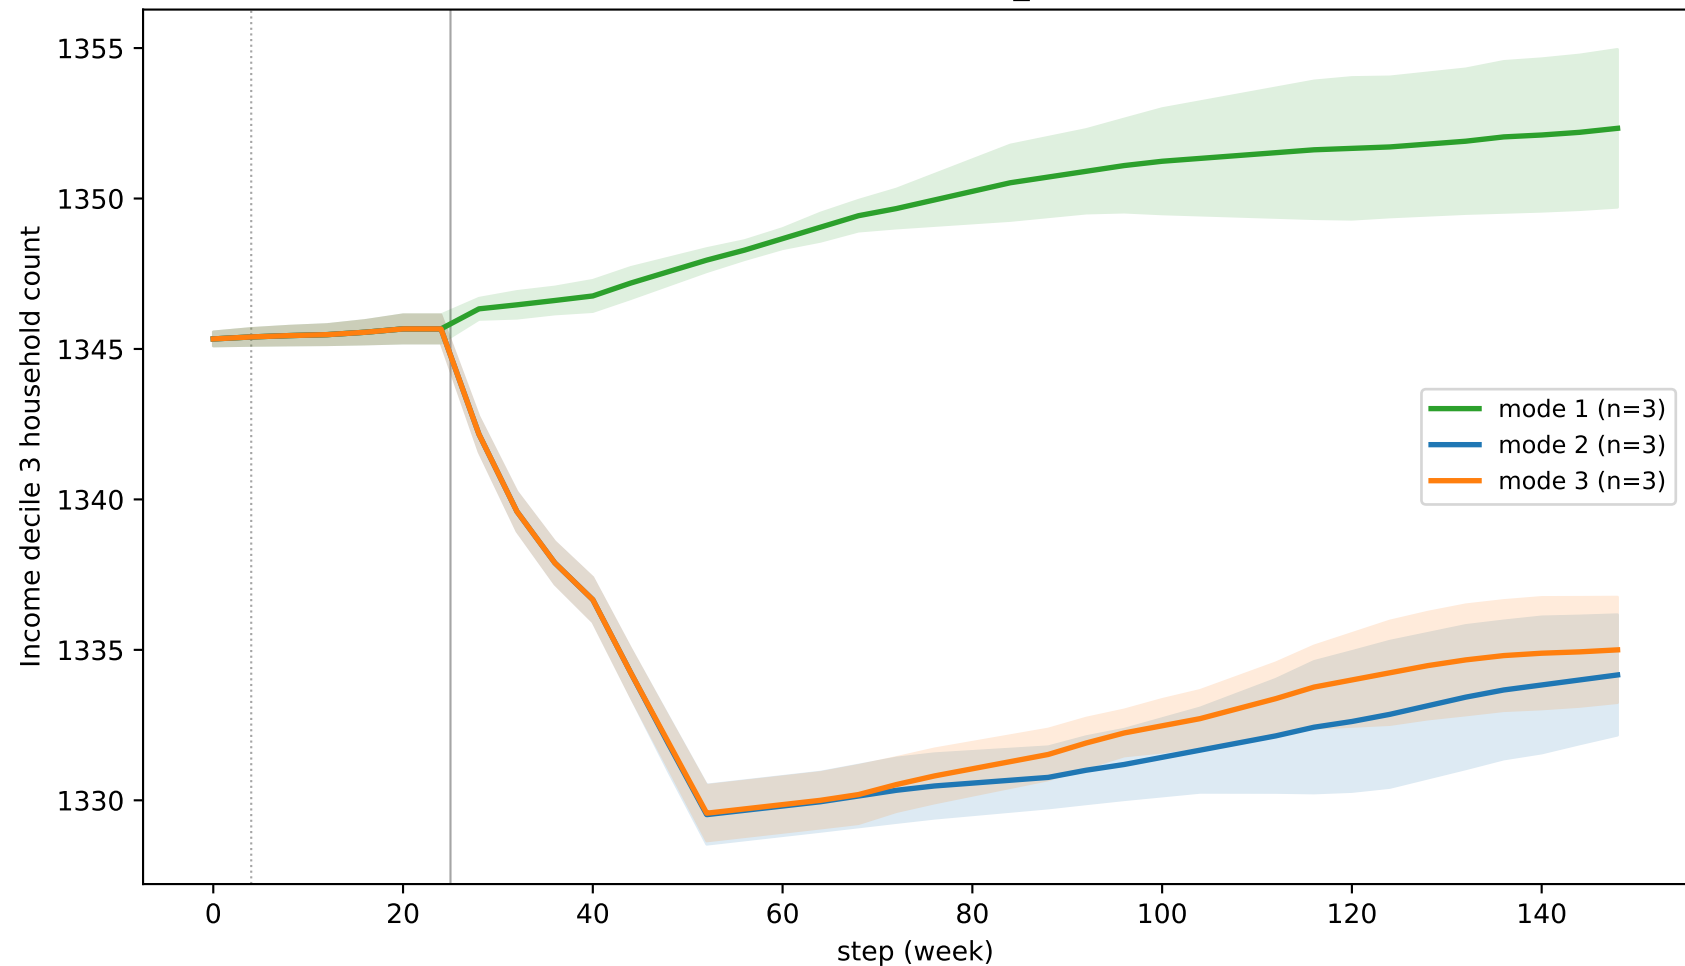

Income decile 1 household count (SA_FIRST, sum across SAs)

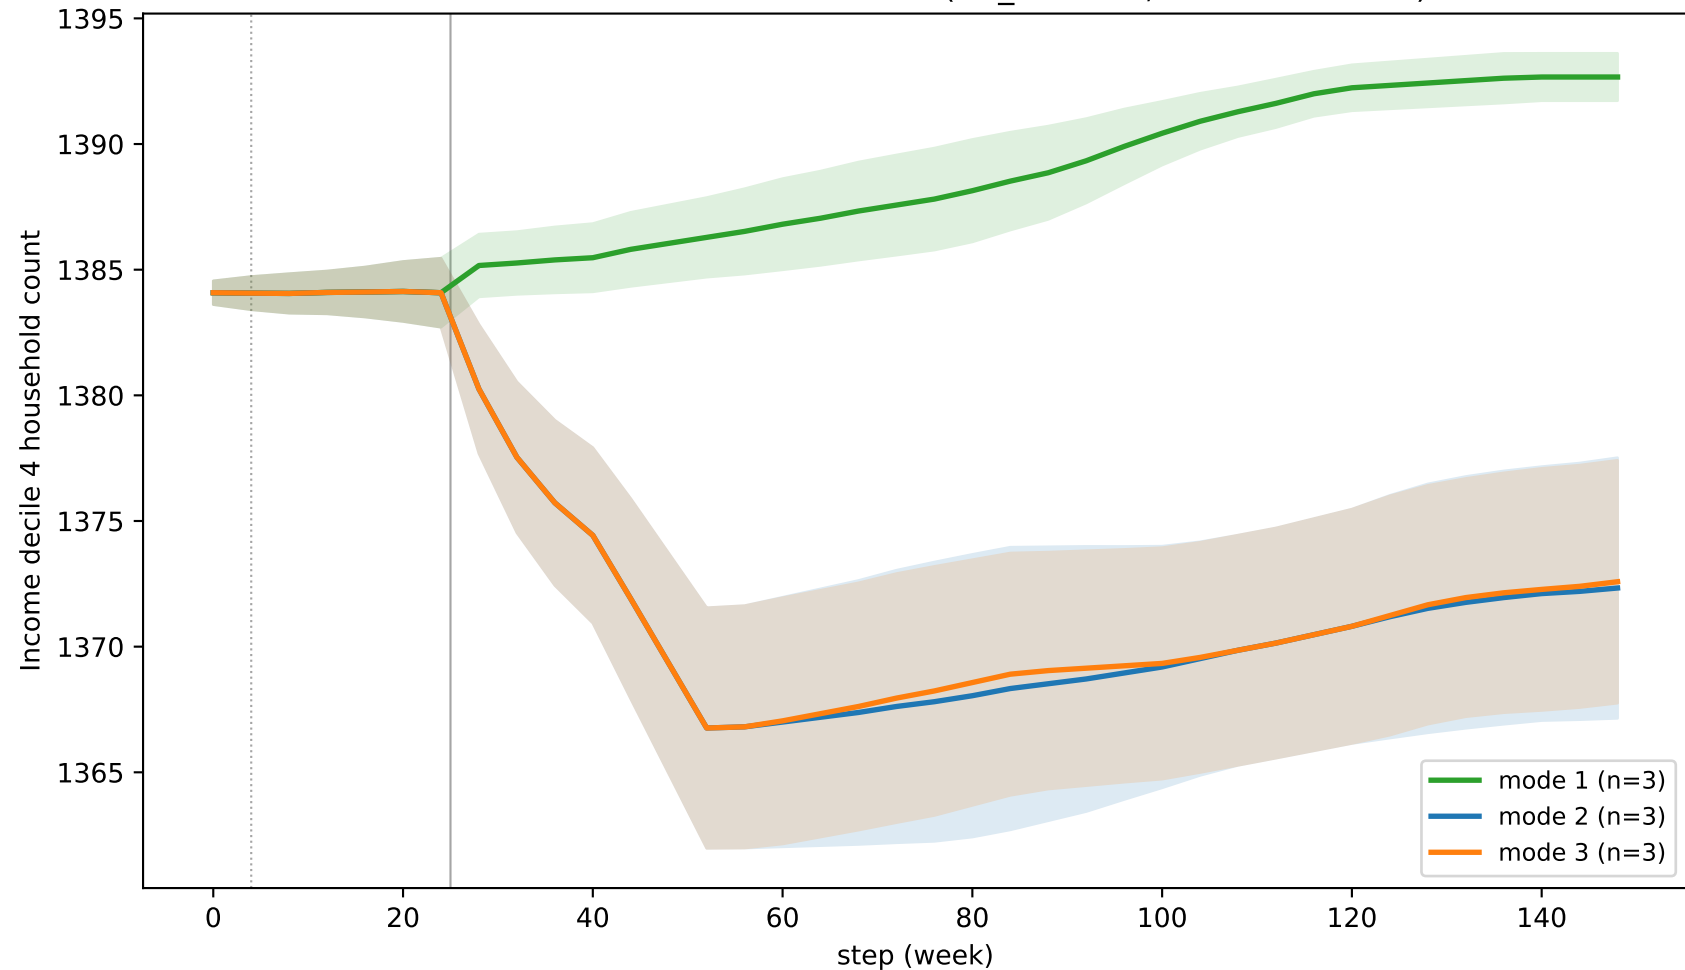

Income decile 2 household count (SA_SECOND, sum across SAs)

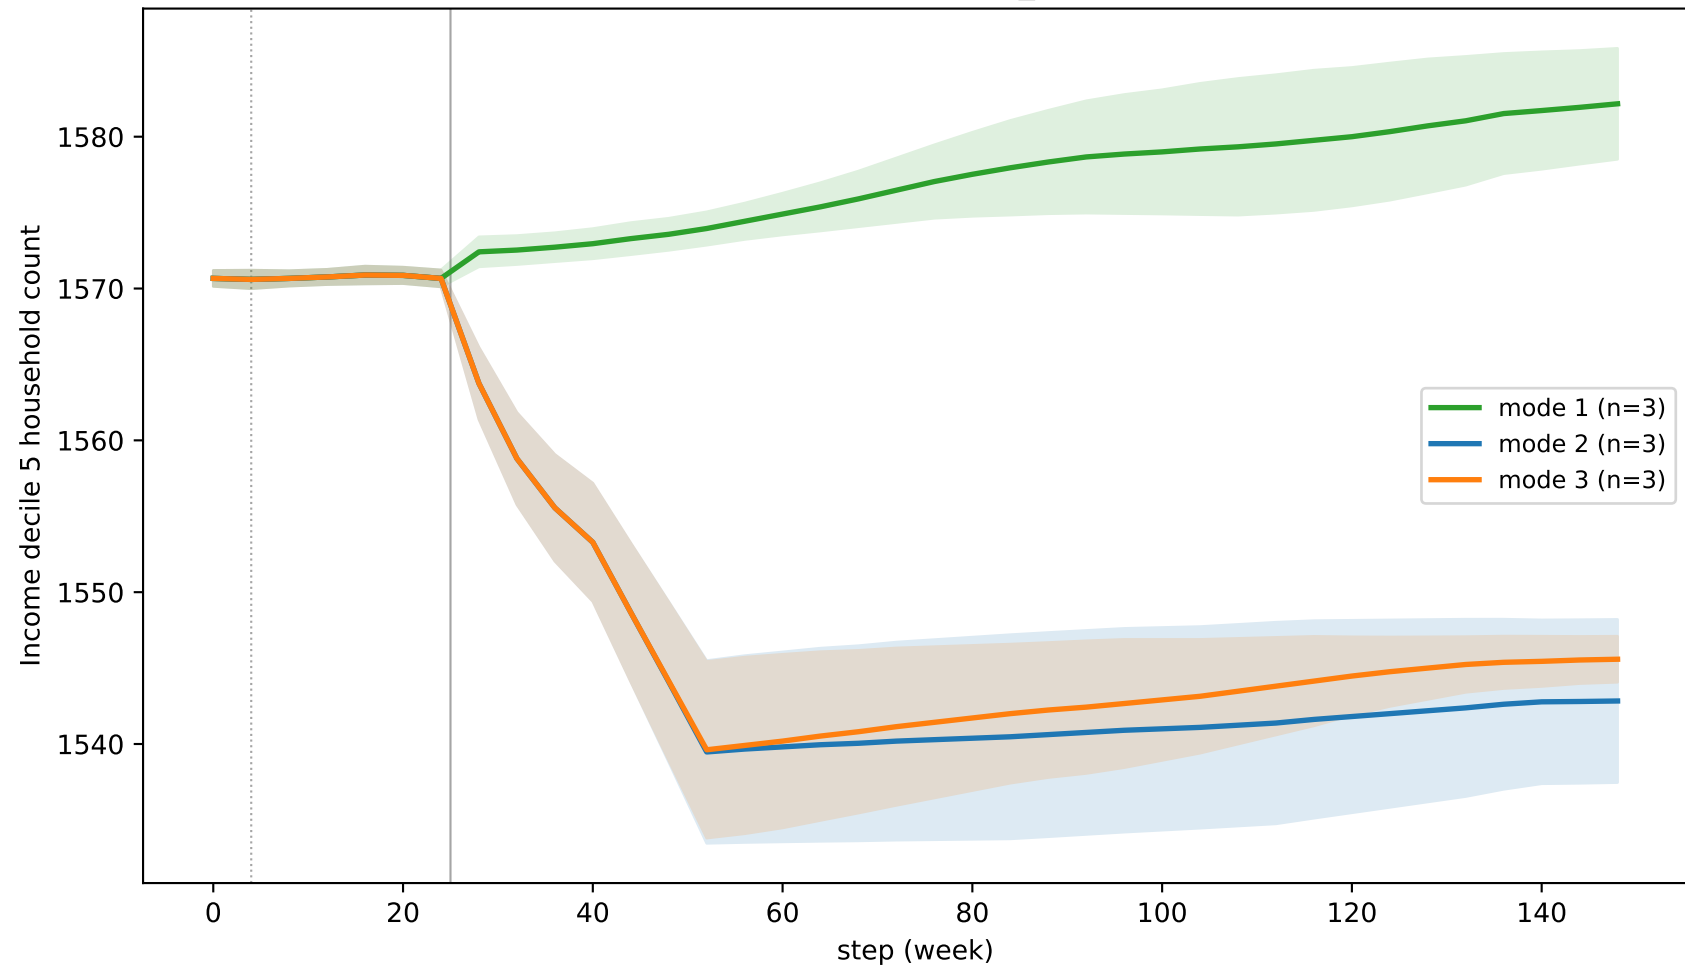

Income decile 3 household count (SA_THIRD, sum across SAs)

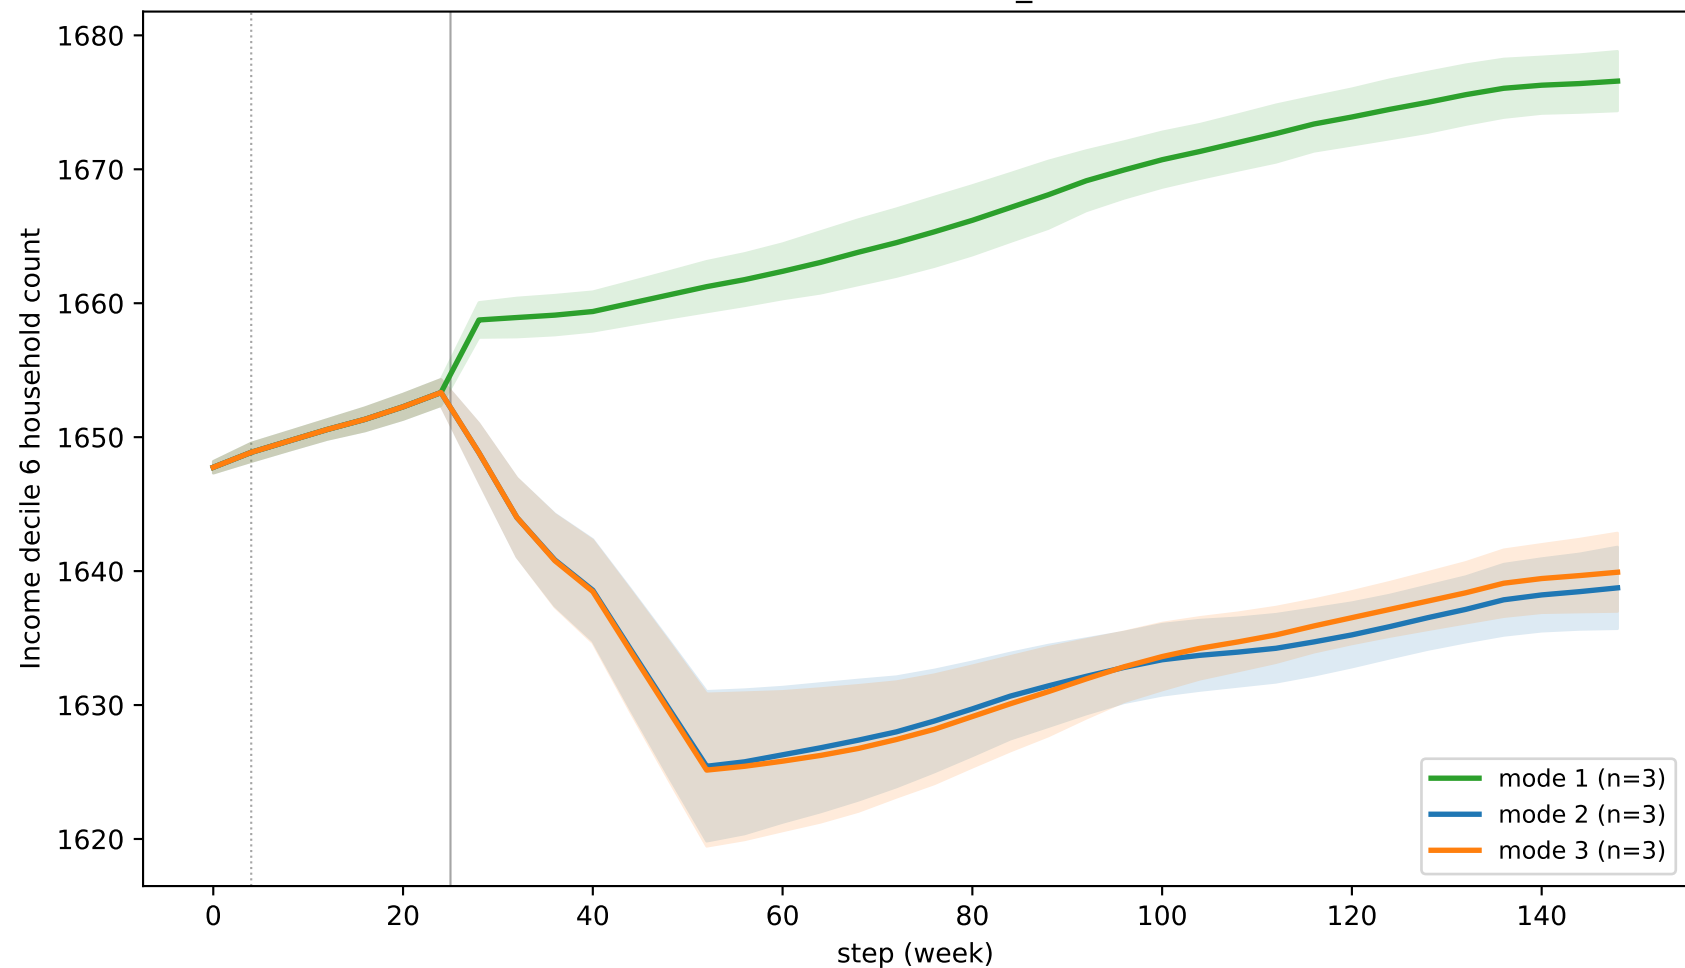

Income decile 4 household count (SA_FOURTH, sum across SAs)

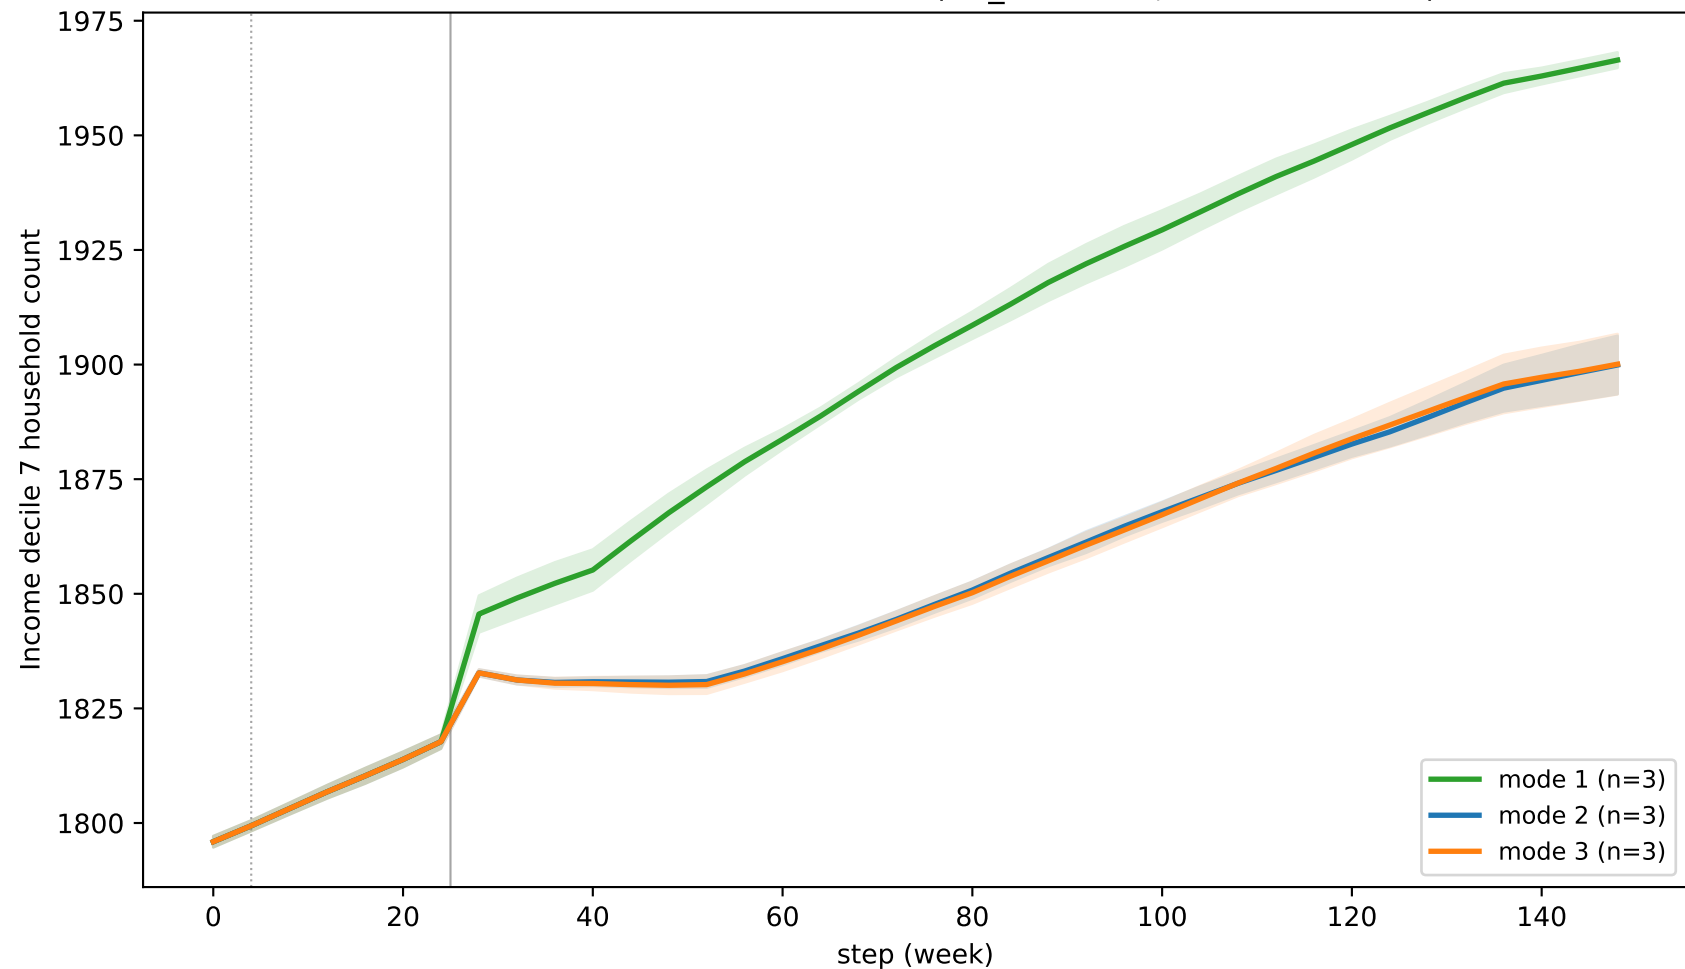

Income decile 5 household count (SA_FIFTH, sum across SAs)

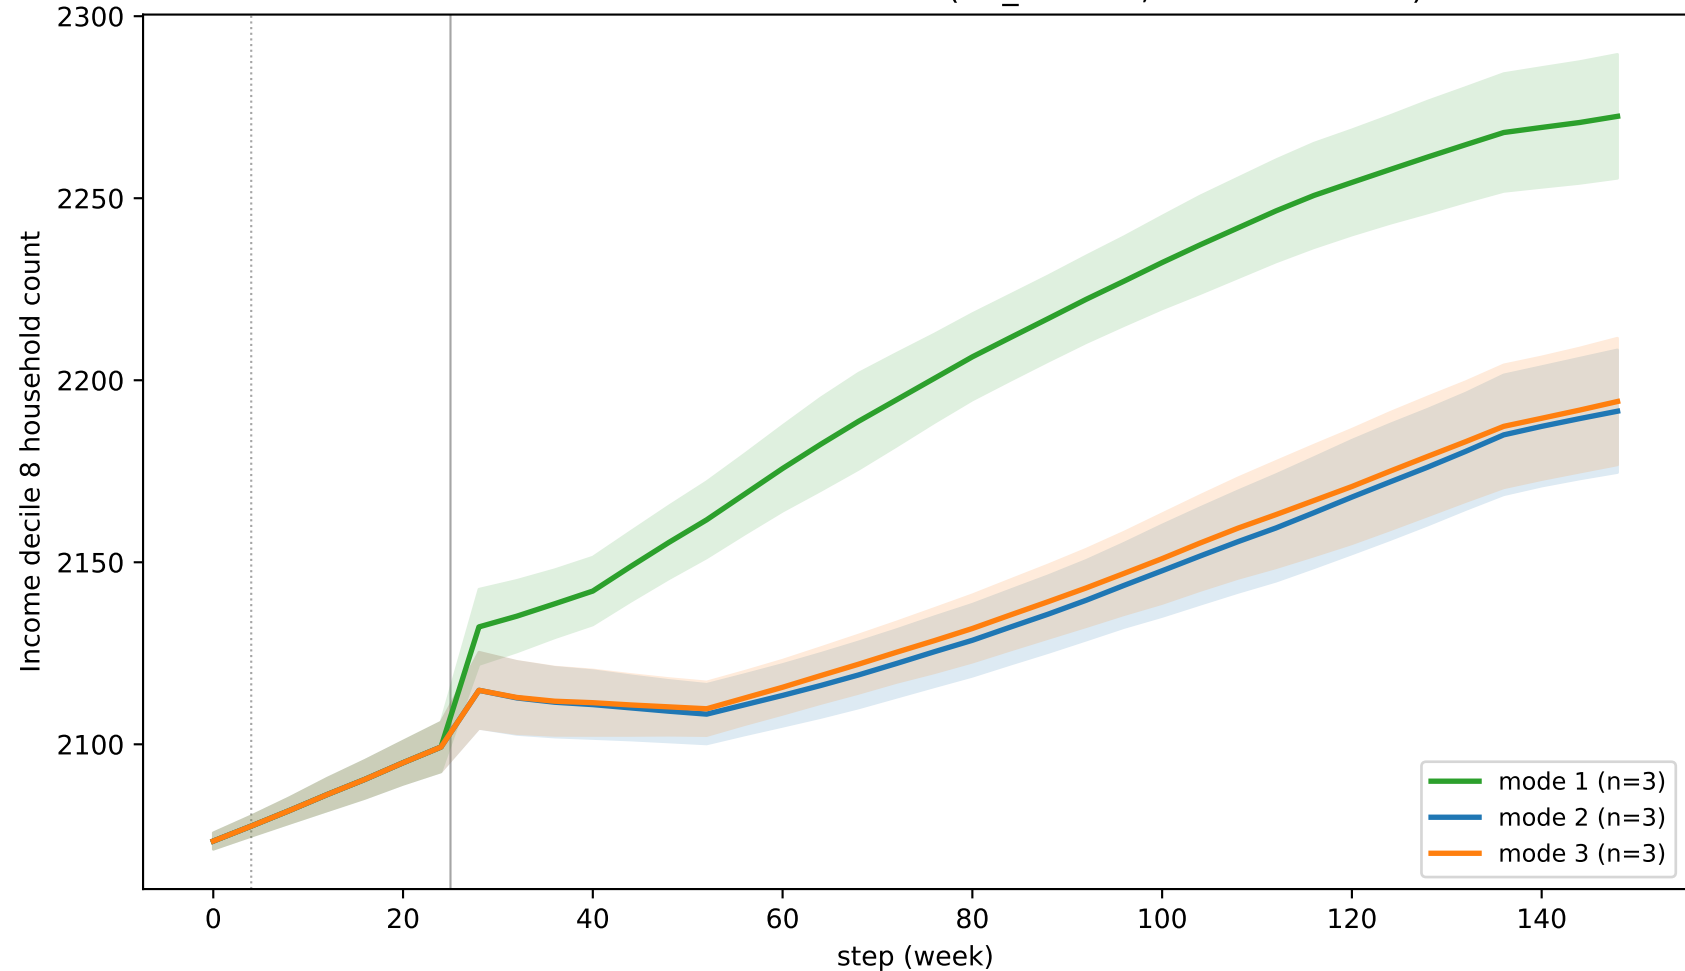

Income decile 6 household count (SA_SIXTH, sum across SAs)

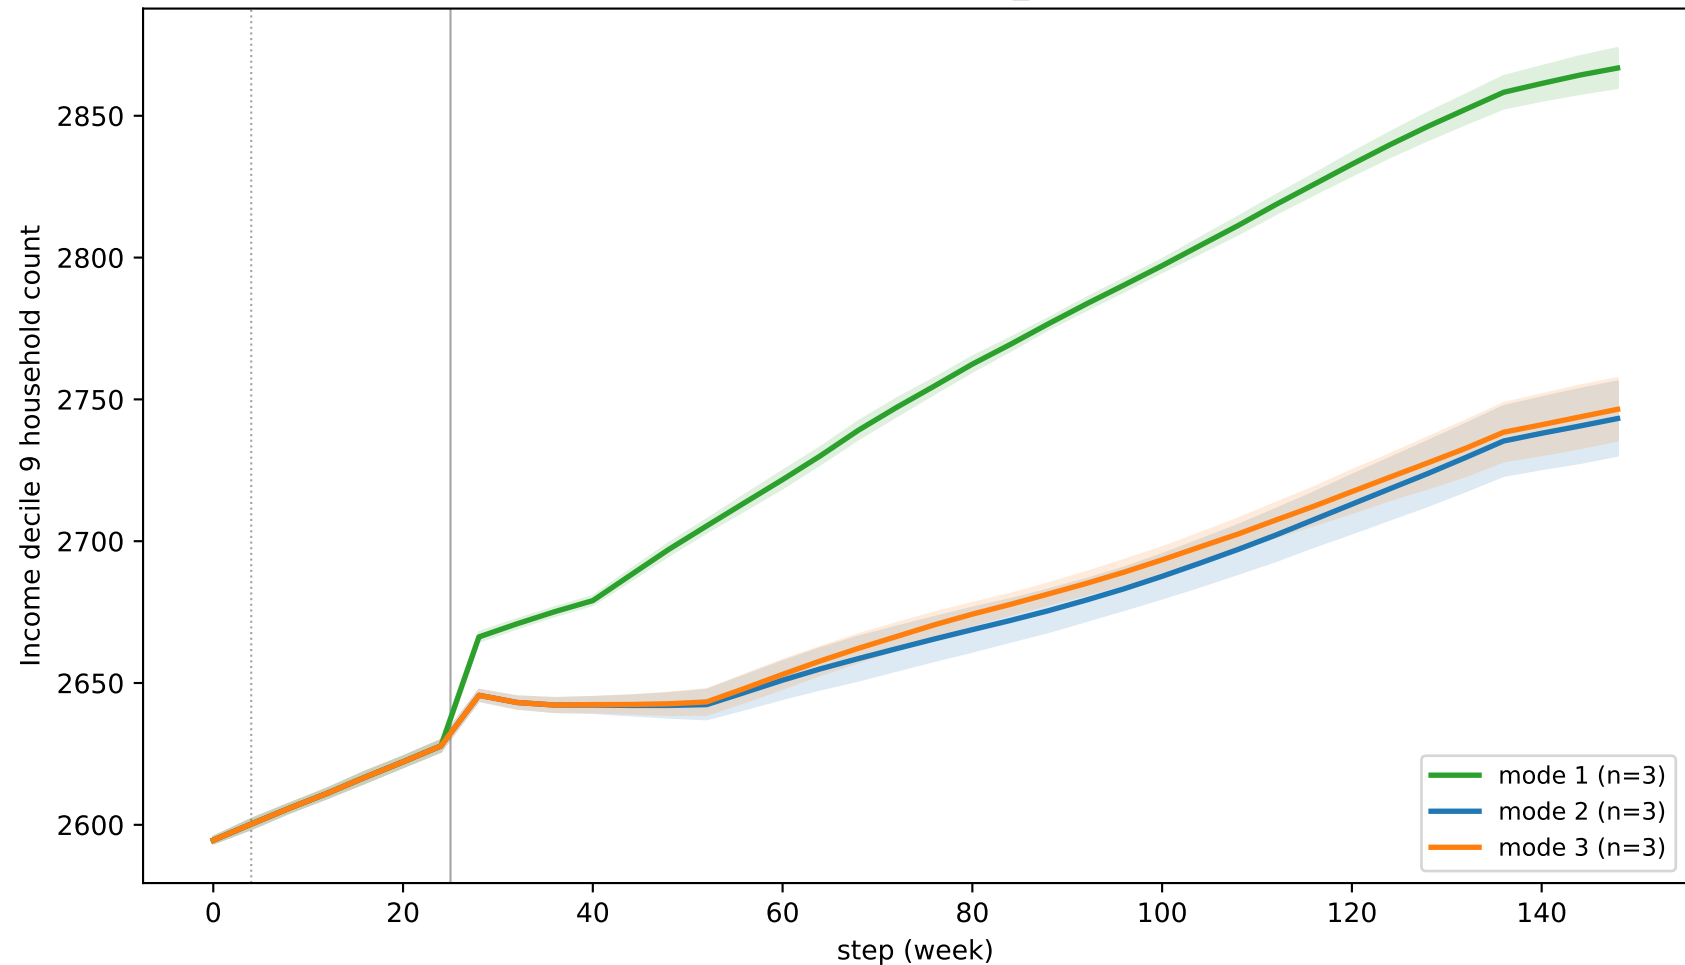

Income decile 7 household count (SA_SEVENTH, sum across SAs)

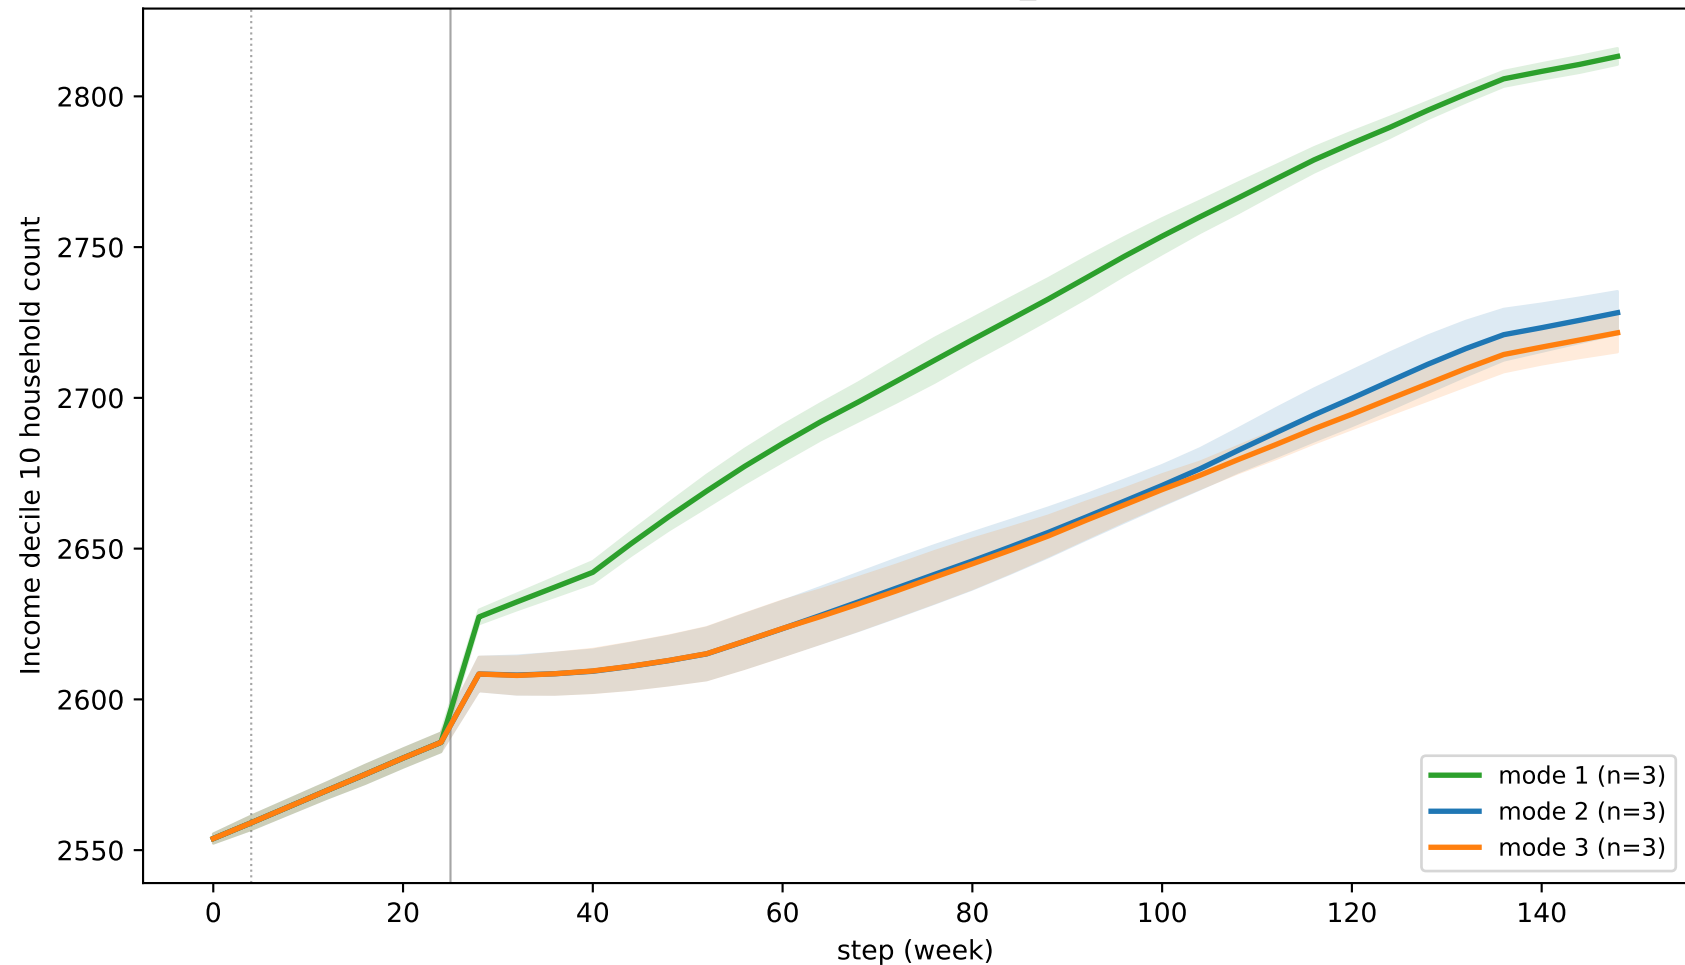

Income decile 8 household count (SA_EIGHTH, sum across SAs)

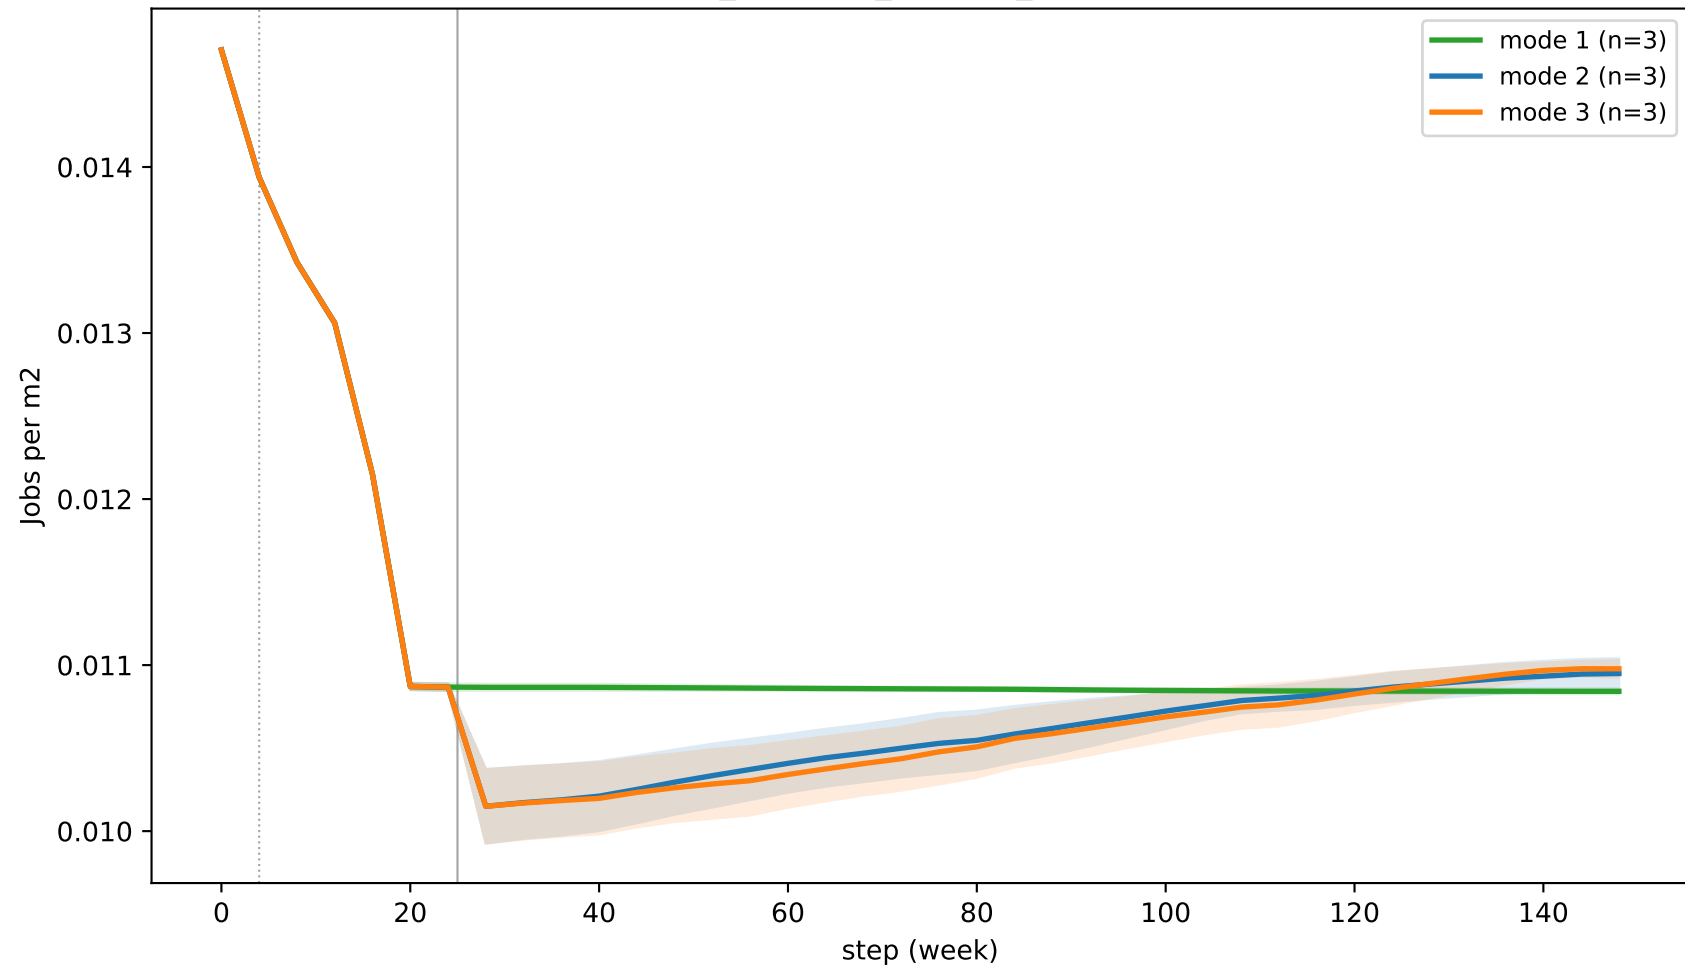

Income decile 9 household count (SA_NINTH, sum across SAs)

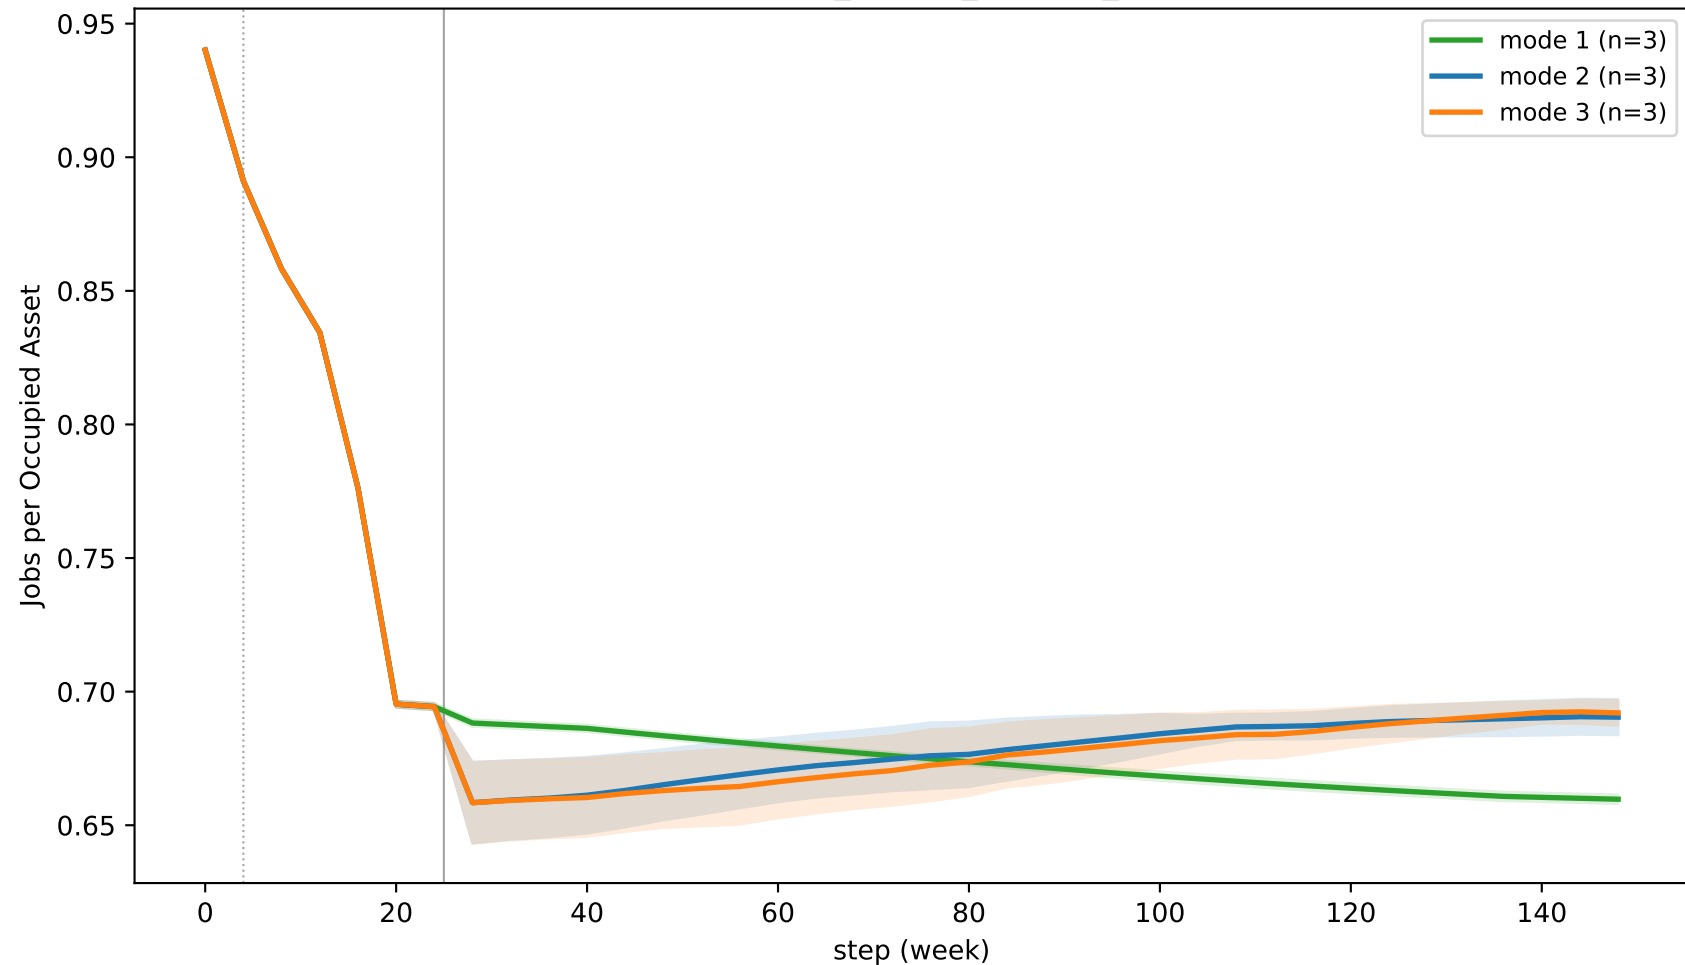

Income decile 10 household count (SA_TENTH, sum across SAs)

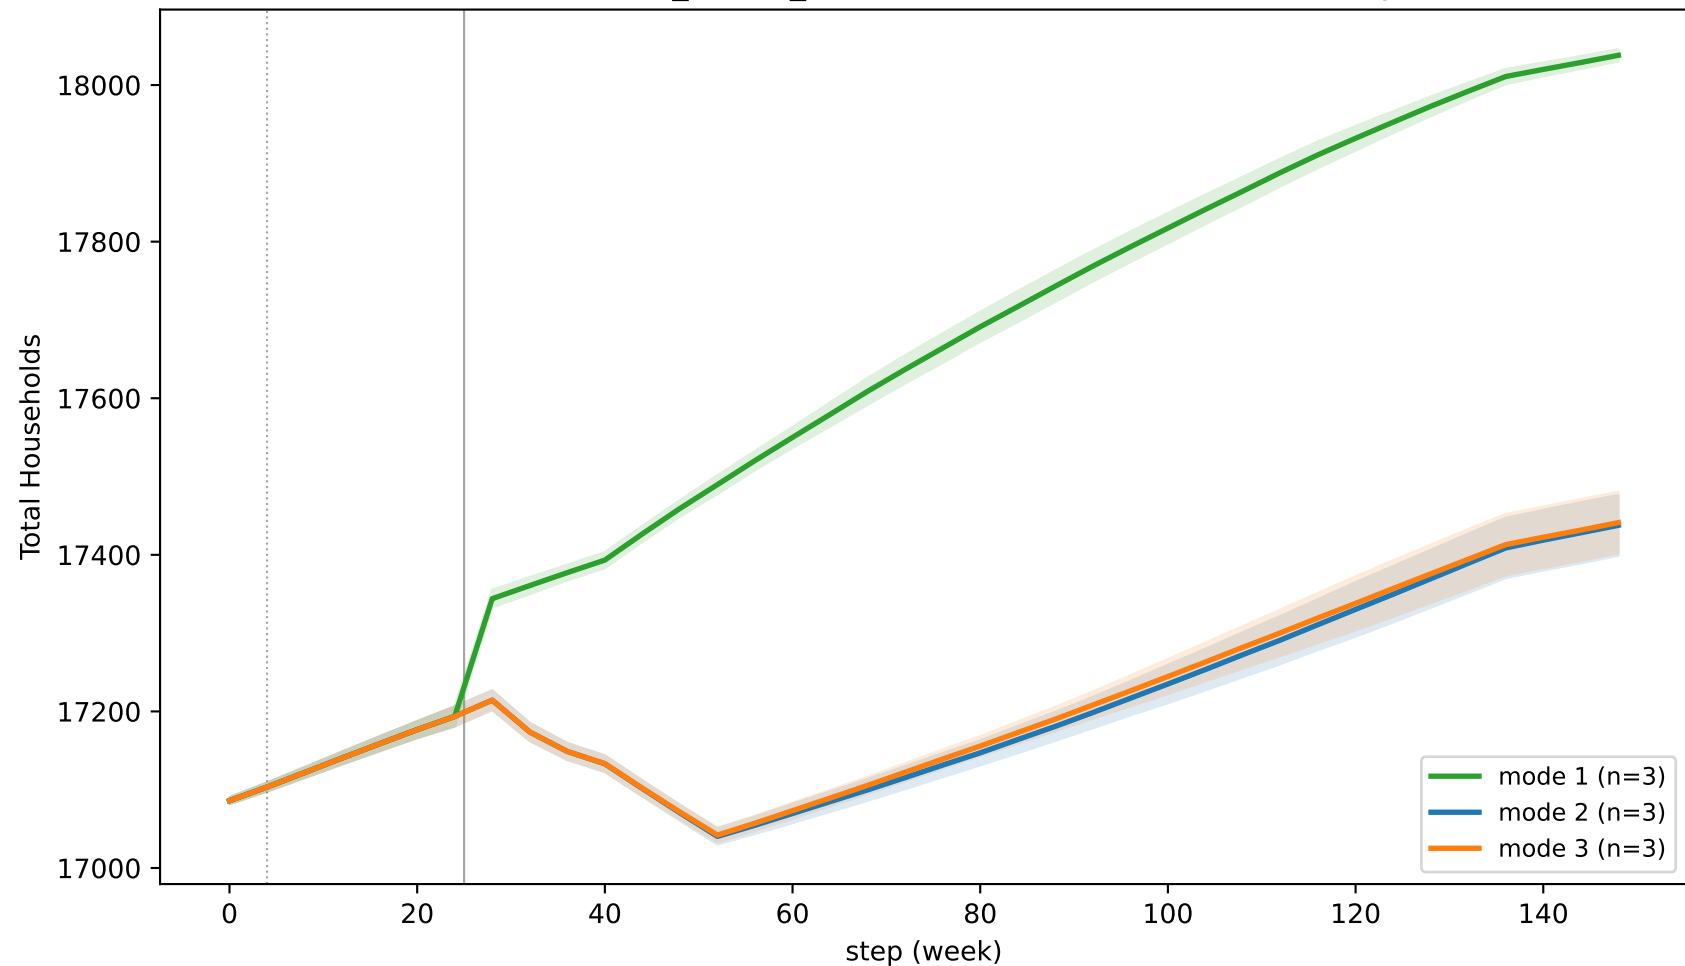

Jobs per m2 (SA_JPM2, SA_WP / SA_AREA, city-total ratio)

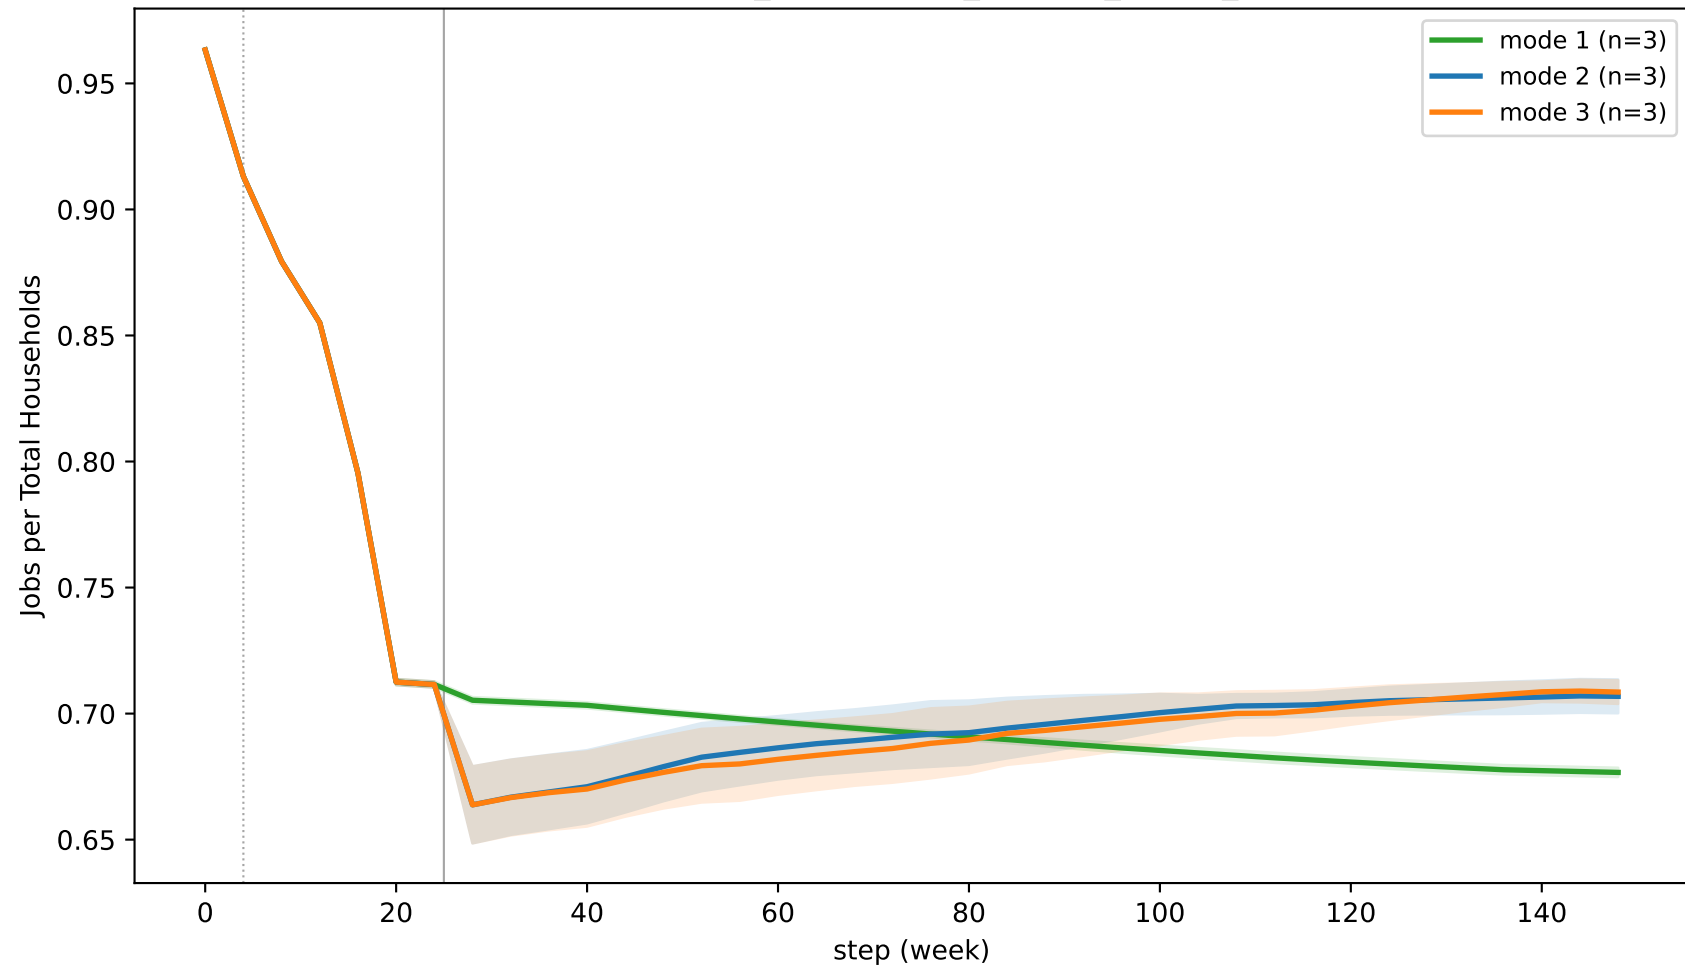

Jobs per Occupied Asset (SA_JPP, SA_WP / SA_POP, city-total ratio)

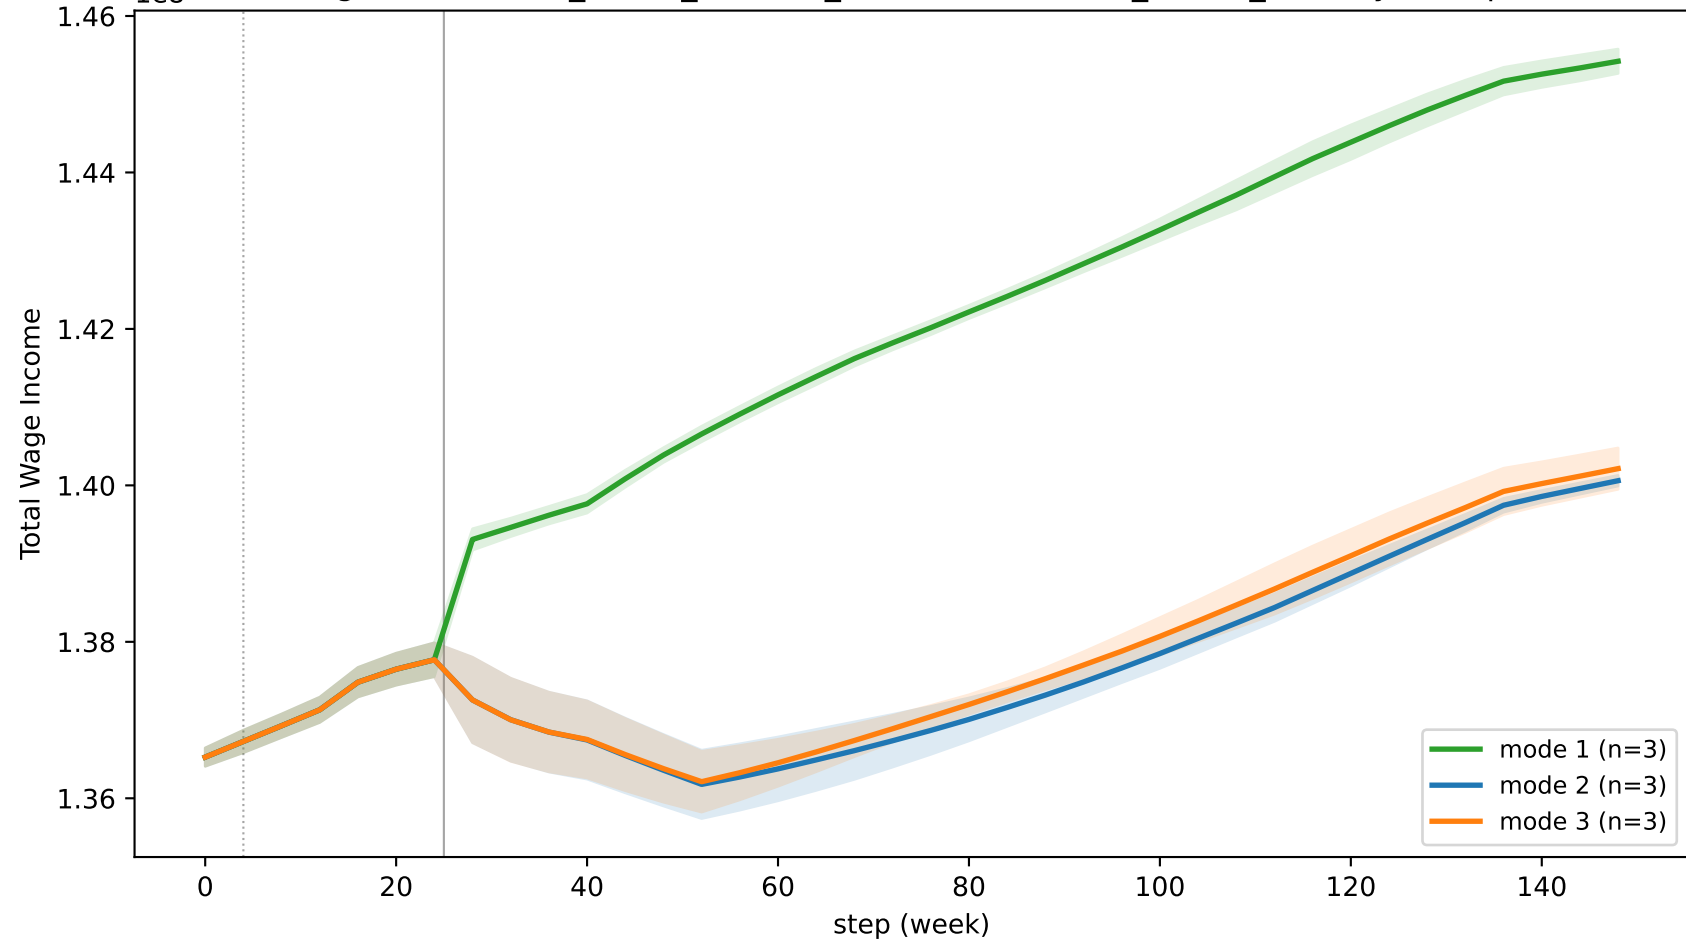

Total Households (SA_TOTAL_HH, sum of the 10 income-decile city totals)

Jobs per Total Households (SA_JPTOTAL, SA_WP / SA_TOTAL_HH, city-total ratio)

1e8 Total Wage Income (SA_WAGE_TOT, SA_WAGE(mean) * SA_TOTAL_HH, city-total product)

Wage-to-House Price Ratio (SA_WAGE_HPRICE, SA_WAGE / SA_HOUSE, city-total ratio)
